ADMINISTRATIVE OFFICERS.

THE UNIVERSITY.

President.....Robert Alexander Falconer, D.Litt., LL.D.
Vice-President.....Robert Ramsay Wright, M.A., LL.D.
Registrar.....James Brebner, B.A.
Bursar.....Ferdinand Albert Mouré, Esq.
Librarian.....Hugh Hornby Langton, M.A.
Curator of the Museum.....Henry Montgomery, M.A., B.Sc., Ph.D.
Curator of the Archæological Section of the Museum.
Charles Trick Currelly, M.A.
Physical Director.....James Warren Barton, M.D.
Superintendent of Buildings and Grounds.
Colin Graham Campbell, B.A.

FACULTY OF MEDICINE.

President.....Robert Alexander Falconer, D.Litt., LL.D.
Dean.....R. A. Reeve, B.A., M.D., LL.D.
Secretary.....A. Primrose, M.B., C.M.
Assistant Secretary.....E. Stanley Ryerson, M.D., C.M.

Note:—Communications relating to standing in all Faculties and Departments and to curricula, instruction and examinations in Graduate Courses, Law, Dentistry, Pharmacy, Agriculture, Music, Pedagogy, Gynmastics and Drill, Commerce and Veterinary Science are to be addressed to the Registrar of the University; correspondence regarding curricula, instruction and examinations in a particular Faculty is to be sent to the Secretary of that Faculty, while enquiries with reference to College instruction and residence are to be addressed to the Registrar of the College concerned.

CALENDAR 1908-1909.

1908—Sept.	1	Tuesday. . . .	Last day for receiving applications for the September Examinations in Medicine.
Sept.	15	Tuesday. . . .	Supplemental Examinations in Medicine begin.
Sept.	15	Tuesday. . . .	Registration in Medicine by the Secretary of the Faculty of Medicine.
Oct.	1	Thursday. . . .	Academic Year begins.
Oct.	1	Thursday. . . .	Enrolment in classes by the various Professors.
Oct.	2	Friday	The Opening Address by the President to the Students of all the Faculties at 3 p.m. in Convocation Hall.
Oct.	2	Friday.	Meeting of the Council of the Faculty of Medicine.
Oct.	9	Friday.	Meeting of Senate.
Nov.	6	Friday.	Meeting of the Council of the Faculty of Medicine.
Nov.	13	Friday.	Term Meeting of Senate.
Dec.	4	Friday.	Meeting of the Council of the Faculty of Medicine.
Dec.	11	Friday.	Meeting of Senate.
Dec. 19-22		Saturday. . . . Tuesday	Term Examinations.
Dec.	22	Tuesday. . . .	Last day of Lectures. Term ends at 5 p.m.
Dec.	23	Wednesday. . .	Railway certificates issued.
Dec.	25	Friday.	University Buildings closed.
1909—Jan.	1	Friday.	University Buildings closed.
Jan.	2	Saturday. . . .	Meeting of the Council of the Faculty of Medicine.
Jan.	6	Wednesday . .	Easter Term begins.
Jan.	8	Friday.	Meeting of Senate.
Feb.	5	Friday.	Meeting of the Council of the Faculty of Medicine.
Feb.	12	Friday.	Meeting of Senate.

HERBERT ALEXANDER BRUCE, M.D., F.R.C.S., ENG.,
Associate Professor of Clinical Surgery.
64 Bloor Street East.

GEORGE HERBERT BURNHAM, M.D., F.R.C.S., EDIN.,
Professor of Ophthalmology and Otology.
2 Bloor Street East.

ELI FRANKLIN BURTON, B.A.,
Demonstrator in Physics. 129 Howland Avenue.

IRVING HEWARD CAMERON, M.B., F.R.C.S., ENG.,
Professor of Surgery and Clinical Surgery.
307 Sherbourne Street.

WILLIAM PROUDFOOT CAVEN, M.B.,
Associate Professor of Clinical Medicine.
70 Gerrard Street East.

GRAHAM CHAMBERS, B.A., M.B.,
Associate in Clinical Medicine. 26 Gerrard Street East.

CHARLES KIRK CLARKE, M.D., LL.D.,
Professor of Psychiatry.
Asylum for Insane, Queen Street West.

JOHN LORENZO DAVISON, B.A., M.D., C.M.,
Professor of Clinical Medicine. 20 Charles Street.

ROBERT JOSEPH DWYER, M.B., M.R.C.P., LOND.,
Associate Professor of Clinical Medicine.
732 Spadina Ave.

WILLIAM HODGSON ELLIS, M.A., M.B.,
Professor of Toxicology. 74 St. Albans Street.

FREDERICK FENTON, M.D., M.B.,
Associate in Clinical Medicine and in Obstetrics.
75 Bloor Street East.

JOHN TAYLOR FOTHERINGHAM, B.A., M.D., C.M.,
Associate Professor of Medicine and Clinical Medicine. 20 Wellesley Street.

ALTON HUYCKE GARRETT, M.D., C.M.,
Demonstrator in Clinical Surgery. 53 College Street.

LACHLAN GILCHRIST, M.A.,
Demonstrator in Physics. 201 McCaul Street.

WILLIAM GOLDIE, M.B.,
Associate in Clinical Medicine. 86 College Street.

ANDREW ROBERTSON GORDON, M.B.,
Associate Professor of Clinical Medicine.
345 Bloor Street West.

FREDERICK LE MAITRE GRASETT, M.B., C.M., F.R.C.S., EDIN.,
Professor of Surgery and Clinical Surgery.
208 Simcoe Street.

VELYIEN EWART HENDERSON, M.A., M.B.,
Lecturer in Pharmacy and Pharmacology.
155 Crescent Road.

FRANCIS BOTELER KENRICK, M.A., PH.D., LEIPZIG.
Associate Professor of Chemistry. 228 Macpherson Avenue.

WILLIAM ROBERT LANG, D.SC., F.I.C.,
Professor of Chemistry and Director of the Chemical Laboratory. The Alexandra Apartments.

CHARLES POTTER LUSK, M.D., C.M.,
Demonstrator in Pharmacy and Pharmacology.
99 Bloor Street West.

ARCHIBALD BYRON MACALLUM, PH.D., SC.D., LL.D., F.R.S.,
Professor of Physiology. 59 St. George Street.

JAMES METCALFE MACCALLUM, B.A., M.D.,
Associate in Ophthalmology and Otology.
13 Bloor Street West.

GEORGE RAYMOND MCDONAGH, M.D.,
Professor of Laryngology and Rhinology.
140 Carlton Street.

KENNEDY CRAWFORD MCILWRAITH, M.B.,
Associate in Obstetrics. 54 Avenue Road.

JOHN JOSEPH MACKENZIE, B.A., M.B.,
Professor of Pathology and Bacteriology and Curator of the Pathological Museum and Laboratories. 41 Chestnut Park Road.

PATRICK WALTER HUGHES MCKEOWN, B.A., M.B.,
Demonstrator in Clinical Surgery. 7 College Street.

JOHN CUNNINGHAM MCLENNAN, B.A., PH.D.,
Professor of Physics and Director of the Physical Laboratory. The Dean's House.

JAMES PLAYFAIR MCMURRICH, M.A., PH.D.,
Professor of Anatomy and Director of the Anatomical Department. 576 Huron Street.

ALEXANDER MCPHEDRAN, M.B.,
Professor of Medicine and Clinical Medicine.
151 Bloor Street West.

HENRY THOMAS MACHELL, M.D.,
Associate Professor of Obstetrics and Pediatrics.
95 Bellevue Ave.

WILLIAM OLDRIGHT, M.A., M.D.,
Professor of Hygiene and Associate Professor of Clinical Surgery. 154 Carlton Street.

HAROLD CAMPBELL PARSONS, B.A., M.D., C.M., M.R.C.P., LOND.,
Associate in Clinical Medicine. 72 Bloor Street West.

WILLIAM HUNTER PIERSOL, B.A., M.B.,
Lecturer in Elementary Biology and Histology.
26 Albany Avenue.

NEWTON ALBERT POWELL, M.D., C.M., M.D. BELLEVUE, N.Y.,
Professor of Medical Jurisprudence and
Associate Professor of Clinical Surgery.
167 College Street.

ALEXANDER PRIMROSE, M.B., C.M., EDIN.,
Associate Professor of Clinical Surgery.
100 College Street.

RICHARD ANDREWS REEVE, B.A., M.D., LL.D.,
Professor of Ophthalmology and Otology.
48 Bloor Street East.

THOMAS BEDFORD RICHARDSON, M.D., C.M., F.R.C.S., EDIN.,
Demonstrator in Clinical Surgery. 128 Bloor Street West.

JAMES FREDERICK WILLIAM ROSS, M.D.,
Professor of Gynæcology. 481 Sherbourne Street.

ROBERT DAWSON RUDOLF, M.D., C.M., M.R.C.P., LOND.,
Associate Professor of Medicine and Associate
in Clinical Medicine. 396 Bloor Street West.

GEORGE STERLING RYERSON, M.D., C.M.,
Professor of Ophthalmology and Otology.
66 College Street.

CHARLES SHEARD, M.D., C.M.,
Professor of Preventive Medicine. 314 Jarvis Street.

CHARLES BUCKINGHAM SHUTTLEWORTH, M.D., C.M., F.R.C.S., ENG.,
Demonstrator in Clinical Surgery. 45 Bloor Street East.

CLARENCE LESLIE STARR, M.B.,
Associate Professor of Clinical Surgery in charge
of Orthopedics. 224 Bloor Street West.

FREDERICK NEWTON GISBOURNE STARR, M.B.,
Associate Professor of Clinical Surgery.
112 College Street.

WILLIAM THEOPHILUS STUART, M.B., M.D., C.M.,
Associate Professor of Medical Chemistry.
197 Spadina Avenue.

CHARLES ALGERNON TEMPLE, M.D., C.M.,
Demonstrator in Clinical Surgery.
398 Palmerston Boulevard.

JAMES ALGERNON TEMPLE, M.D., C.M., MCGILL, LL.D.,
Professor of Gynæcology and Operative Obstetrics.
333 Bloor Street West.

LUKE TESKEY, M.D., C.M.,
Professor of Surgery and Clinical Surgery.
612 Spadina Avenue.

WILLIAM BROWN THISTLE, M.D.,
Associate Professor of Clinical Medicine.
171 College Street.

CHARLES TROW, M.D., C.M.,
Associate Professor of Ophthalmology and Otology.
57 Carlton Street.

JOHN FRANKLIN UREN, M.D., C.M.,
Demonstrator in Clinical Surgery. 520 Church Street.

DAVID JAMES GIBB WISHART, B.A., M.D., C.M., McGILL,
Associate Professor of Laryngology and Rhinology.
47 Grosvenor Street.

EDMUND MURTOR WALKER, B.A., M.B.,
Lecturer in Zoology. 99 St. George Street.

ADAM HENRY WRIGHT, B.A., M.D.,
Professor of Obstetrics. 30 Gerrard Street East.

ROBERT RAMSAY WRIGHT, M.A., B.Sc., LL.D.,
Professor of Biology. St. George Apartments.

SESSIONAL APPOINTMENTS.

ALLAN HUSTON ADAMS, B.A., M.B.,
Class Assistant in Biology. 335 Jarvis Street.

WILLIAM FRANCIS MORRIS ADAMS,
Assistant Demonstrator in Physiology.
605 Euclid Avenue.

THOMAS BOLES ALLEN, B.A.,
Assistant in Chemistry. 154 Morse Street.

GEORGE WILLIAM ANDERSON, B.A.,
Class Assistant in Biology. 6 Castle Frank Road.

THOMAS DICKSON ARCHIBALD, B.A., M.B.,
Demonstrator in Medicine and Laboratory Assistant in Bacteriology. 507 College Street.

ROBERT GARDINER ARMOUR, B.A.,
Class Assistant in Pharmacology and Assistant Demonstrator in Physiology. 103 Avenue Road.

PARKER McEWEAN BAYNE, B.A.,
Laboratory Assistant in Biology. 173 College Street.

IRVING RUSSELL BELL, B.A.,
Class Assistant in Biology and Assistant Demonstrator in Physiology.
72 Robert Street.

EDMUND BOYD, B.A.,
Lecture and Laboratory Assistant in Biology.
119 Bloor Street East.

EDWARD CECIL BURSON, M.B.,
Assistant in Clinical Medicine. Deer Park.

MALCOLM HECTORSON VALENTINE CAMERON, M.B.,
Assistant in Clinical Laboratory. 379 Spadina Ave.

ALAN WOODBURN CANFIELD, M.D., C.M.,
Assistant Demonstrator in Anatomy. 660 Bathurst Street.

FREDERICK ARNOLD CLARKSON, M.B.,
Demonstrator in Pathology. 471 College Street.

EDWARD COOPER COLE, B.A.,
Class Assistant in Biology. 103 Gloucester Street.

H. C. COOKE,
Assistant in Chemistry.

CHARLES JOSEPH COPP, M.D., C.M.,
Assistant Demonstrator in Anatomy. 96 Wellesley Street.

WILLIAM HUME CRONYN, B.A., M.B.,
Class Assistant in Pharmacology and Assistant Demonstrator in Physiology. 35 South Drive.

OSWALD TILSON DINNICK, M.B.,
Assistant Demonstrator in Anatomy. 102 College Street.

ARTHUR WILLIAM MICKLE ELLIS, B.A.,
Class Assistant in Pharmacy and Pharmacology.
74 St. Alban's St.

EDWARD FIDLAR, B.A., M.B.,
Assistant Demonstrator in Physiology. 16 Wood Street.

JOHN GERALD FITZGERALD, M.B.,
Demonstrator in Psychiatry. Deer Park.

WILLIAM EDWARD GALLIE, M.B.,
Demonstrator in Anatomy. 169 College Street.

JOHN ALEXANDER GARDINER, B.A.,
Class Assistant in Physics. 18½ Nassau Street.

WILLIAM GOLDIE, M.B.,
Demonstrator in Applied Physiology. 86 College Street.

ROSS AIKEN GORTNER, M.S., VANDERBILT,
Assistant in Chemistry. 231 McCaul Street.

JOSEPH SUTHERLAND GRAHAM, M.B.,
Demonstrator in Pathology. 55 College Street.

FREDERICK CHRISTOPHER HARRISON, B.A.,
Class Assistant in Pharmacy and Pharmacology and Assistant Demonstrator in Physiology.
643 Ontario Street.

VELYIEN EWART HENDERSON, M.A., M.B.,
Lecturer in Therapeutics. 155 Crescent Road.

ARTHUR CLINTON HENDRICK, M.A., M.B.,
Assistant Demonstrator in Anatomy. 646 Spadina Avenue.

WILLIAM BELFREY HENDRY, B.A., M.B.,
Assistant Demonstrator in Anatomy. 181 Carlton Street.

CLARENCE MEREDITH HINCKS, B.A., M.B.,
Class Assistant in Biology, 225 Dunn Avenue.

RALPH EBENEZER HOOPER, B.A., M.B.,
Assistant Demonstrator in Anatomy.
415 Bloor Street West.

GOLDWIN WILLIAM HOWLAND, B.A., M.B., M.R.C.P., LOND.,
Demonstrator in Medicine and Demonstrator in Pathology. 540 Spadina Ave.

ARCHIBALD GOWANLOCK HUNTSMAN, B.A., M.B.,
Instructor in Biology. 255 Gerrard Street East.

HENRY SEATON HUTCHISON, M.B.,
Demonstrator in Pathology and Assistant in Clinical Medicine. 317 Sherbourne Street.

WM. WARNER JONES, B.A., M.B., F.R.C.S., ENG.,
Demonstrator in Clinical Surgery and Assistant Demonstrator in Anatomy.
92 College Street.

SAMUEL JOHNSTON, B.A., M.D., C.M.,
Demonstrator in Clinical Surgery. 169 Carlton Street.

WILLIAM T. KENNEDY,
Class Assistant in Physics.
96 Brunswick Avenue.

JAMES ALEXANDER KINNEAR, M.D., C.M.,
Demonstrator in Obstetrics. 177 Carlton Street.

ARCHIBALD BRUCE MACALLUM, B.A.,
Assistant Demonstrator in Physiology.
59 St. George Street.

WILLIAM JAMES MCCOLLUM, M.B.,
Demonstrator in Medicine. 94 Shuter Street.

EDWARD ALLISTER MCCULLOCH, B.A., M.B.,
Class Assistant in Biology, Class Assistant in Pharmacy and Pharmacology.
167 College Street.

PERCY BLAKELY MACFARLANE, B.A.,
Assistant in Physiology and Class Assistant in Pharmacology.
9 MacKenzie Crescent.

DONALD MCGILLIVRAY, M.B.,
Demonstrator in Medicine. 62 College Street.

ALEXANDER JOHN MACKENZIE, B.A., M.B., LL.B.,
Class Assistant in Biology and Assistant Demonstrator in Anatomy. 154 Carlton Street.

JOHN FRANCIS MACKEY, B.A.,
Assistant in Chemistry. 105 Lippincott Street.

MATTHEW DONALD MCKICHAN, B.A., M.B.,
Class Assistant in Biology. 673 Broadview Ave.

JOHN HARRIS MCPHEDRAN, M.D.,
Assistant in Clinical Laboratory. 659 Dovercourt Road.

HENRY ALLEN MCTAGGART, B.A.,
Assistant Demonstrator in Physics. 178 Major Street.

WILLIAM JOHN OGILVIE MALLOCH, B.A., M.B., F.R.C.S., ENG.,
Assistant Demonstrator in Anatomy and Demonstrator in Clinical Surgery. 327 College Street.

RODGER JAMES MANNING, M.A.,
Fellow in Chemistry. 132 Roxborough Street West.

WILLIAM JAMES MORDEN MARCY,
Class Assistant in Pharmacy and Pharmacology and Assistant Demonstrator in Physiology.
120 Ann Street.

FREDERICK WILLIAM MARLOW, M.D., C.M., F.R.C.S., ENG.,
Assistant Demonstrator in Anatomy and Demonstrator in Gynæcology. 417 Bloor Street West.

FREDERICK ROBERT MILLER, B.A., M.B.,
Demonstrator in Physiology. 280 Carlton Street.

ALLAN FULSON ODELL, B.Sc., NEBRASKA WESLEYAN,
Assistant in Chemistry. 231 McCaul Street.

BEEFNEY O'RIELLY, M.D., C.M.,
Demonstrator in Pathology and Assistant in Clinical Medicine. 52 College Street.

CHARLES BEMISTER PARKER,
Assistant Demonstrator in Physiology.
43 St. James' Avenue.

HAROLD CAMPBELL PARSONS, B.A., M.D., C.M., M.R.C.P., LOND.,
Demonstrator in Pathology, Assistant in Clinical Medicine. 72 Bloor Street West.

WILLIAM HERBERT PEPLER, M.D., C.M.,
Demonstrator in Pathology. 600 Spadina Avenue.

VIVIAN ELLSWORTH POUND, B.A.,
Assistant Demonstrator in Physics. 74 Robert Street.

JOHN KELLOCK ROBERTSON, B.A.,
Assistant Demonstrator in Physics. 22 Sussex Avenue.

LAWRENCE BRUCE ROBERTSON, B.A.,
Assistant Demonstrator in Physiology. 1 Bedford Road.

CHARLES EDWARD ROWLAND, B.A.,
Assistant Demonstrator in Physiology. 18 Montague Place.

WILLIAM KIELD ROSS, M.D., C.M.,
Demonstrator in Psychiatry.
Asylum for the Insane, Queen Street West.

EDWARD STANLEY RYERSON, M.D., C.M.,
Demonstrator in Pathology and Demonstrator in Clinical Surgery and Assistant Curator of Pathological Museum. 243 College Street.

WALLACE ARTHUR SCOTT, B.A., M.B., F.R.C.S.,, ENG.,
Assistant Demonstrator in Anatomy and Demonstrator in Clinical Surgery. 576 Church Street.

CHARLES BUCKINGHAM SHUTTLEWORTH, M.D., C.M., F.R.C.S., ENG.,
Senior Demonstrator in Anatomy. 45 Bloor Street East.

GIDEON SILVERTHORN, M.B.,
Demonstrator in Pathology and Demonstrator in Clinical Surgery. 266 College Street.

ALEXANDER MCGREGOR SIMPSON,
Assistant Demonstrator in Physics. 607 Yonge Street.

DAVID KING SMITH, M.B.,
Demonstrator in Dermatology. 311 Jarvis Street.

GEORGE EDWARD SMITH, B.A., M.B.,
Assistant Demonstrator in Anatomy. 380 King Street West.

A. T. STUART,
Assistant in Chemistry.

CHARLES JAMES WAGNER, M.B.,
Demonstrator in Applied Physiology, Pathology and Assistant in Clinical Medicine. 19 Gerrard Street East.

SAMUEL HARRY WESTMAN, M.B.,
Assistant Demonstrator in Anatomy and Demonstrator in Clinical Surgery. 341 Bloor Street West.

CHARLES SEYMOUR WRIGHT,
Class Assistant in Physics. 60 Crescent Road.

COUNCIL OF THE FACULTY OF MEDICINE.

GENERAL INFORMATION FOR STUDENTS.

DISCIPLINE.

The Council of University College, and the governing bodies of the federated universities and colleges, respectively, have disciplinary jurisdiction over and entire responsibility for the conduct of their students in respect of all matters arising or occurring in or upon their respective college buildings and grounds, including residences.

The councils of such of the faculties as have assigned for their separate use any building or buildings and grounds, including residences, have disciplinary jurisdiction over and entire responsibility for the conduct of all students in their respective faculties in respect of all matters arising or occurring in or upon such building, or building and grounds.

In all such cases, and, save as aforesaid, as respects all students to whatsoever college or faculty they may belong, disciplinary jurisdiction is vested in the Caput, but the Caput may delegate its authority in any particular case or by any general regulation to the council or other governing body of the university or college or faculty to which the student belongs.

The Caput has also power and authority to determine by general regulation, or otherwise, to what college, faculty or other body the control of university associations belongs.

If there be any question as to the proper body to exercise jurisdiction in any matter of discipline which may arise, the same shall be determined by the Caput, whose decision shall be final.

Disciplinary jurisdiction includes the power to impose fines.

INFORMATION FOR STUDENTS IN MEDICINE.

The twenty-first session since the re-establishment of the Medical Faculty of the University of Toronto will commence on Monday, the 4th of October, 1908, when the opening lecture will be delivered at 8.30 p.m., in Convocation Hall.

DEGREES.

The degree of M.B. is given to the students who have matriculated and who have completed the prescribed course of study and passed the examinations required. The degree of M.D. is conferred on Bachelors of Medicine of at least one year's standing who have presented an approved thesis or who have passed a prescribed examination.

ENTRANCE.

Candidates for a degree must pass the Junior Matriculation examination, unless (1) they possess a degree in Arts, not being an honorary degree, from any Canadian or British University; or, (2) have already matriculated in the faculty of Arts or in the faculty of Law in this University; or, (3) have been registered as matriculates in the College of Physicians and Surgeons of Ontario. Candidates may delay Matriculation until the beginning of the second year of professional study. Registration will not be permitted in the second year until matriculation has been completed. If possible candidates should matriculate before commencing their medical studies.

INSTRUCTION.

The course of instruction given by the faculty of Medicine prepares students primarily for the degree of M.B., and for the license of the Ontario College of Physicians and Surgeons, but it fulfils the requirements of other Canadian and British Universities and it aims at giving the student such a training in the sciences as is now exacted of all those who desire to obtain any British medical qualification in addition to a Canadian one.

The new building of the faculty of Medicine has been completed, and is fully equipped. A detailed description of

it will be found elsewhere in the calendar. With the completion of this building, a series of laboratories and lecture theatres is provided on the University grounds where the most ample facilities are afforded for both the practical and didactic instruction of students in every department embraced in the medical curriculum. The laboratories of the new building will be devoted solely to the departments of Physiology and Pathology, and in addition to the provision made for instruction of undergraduate students, a series of special laboratories is to be found, fully equipped for research work. As heretofore, lectures and demonstrations will be given in the Biological, Chemical, Physical and Anatomical Laboratories and lecture rooms of the University. It is impossible to provide more complete and efficient accommodation for the teaching of scientific medicine than that which exists in the University of Toronto to-day.

Clinical instruction is given in the Toronto General Hospital, the Mercer Eye and Ear Infirmary, the Burnside Lying-in Hospital, the Hospital for Sick Children, St Michael's Hospital and other medical charities of Toronto. The facilities for clinical instruction have been very greatly improved, and the student has the fullest opportunities for making a thorough examination of all the cases of disease which are found in the wards and out-patient rooms of the hospitals. The students are arranged in small classes (of from twelve to fourteen) in order to facilitate this, and to enable the clinical teachers to give as much personal instruction as possible to each student.

The hospital facilities provided for the instruction of students in connection with the University will be greatly augmented in the immediate future. The Toronto General Hospital Trust has been reconstituted and a new and modern hospital will be built on College Street near the University, where an equipment for the scientific practice of medicine and surgery will be provided second to none on the continent in efficiency. Already upwards of a million dollars have been subscribed to further the building project. The munificent gift of $100,000 by Mr. Cawthra Mulock will provide unsurpassed accommodation for the treatment of patients in the outdoor department, and will afford exceptional facilities for the instruction of students.

The faculty has in the General Hospital a laboratory for clinical pathology and chemistry, which has been furnished with microscopes and all apparatus required for the examination of pathological fluids and specimens; and students, when they act as clinical clerks, will be admitted to all the privileges of the laboratory.

In the department of anatomy, the arrangements for instruction are now unsurpassed. In addition to other methods of illustrating anatomy, there will be courses in which the projection microscope will be employed to demonstrate to large classes the relational structure of the different parts of the body as exhibited in frozen sections. In materia medica also the course of instruction conforms to the most advanced methods.

The faculty has spared no expense in making the arrangements for medical instruction perfect, and is convinced that these, added to the unrivalled facilities offered by the University laboratories for the study of chemistry, physics, biology, anatomy, histology, physiology and pathology, will furnish the fullest opportunities to the student for acquiring a medical education of the most advanced and most progressive character.

Attention is directed to a recent establishment of a Museum of Hygiene.

EXAMINATIONS.

In addition to the Matriculation examination, candidates are required to pass five examinations, which must be taken in the following order: the First at the end of the first session; the Second at the end of the second session; the Third at the end of the third session, and the fourth at the end of the fourth session, and the final at the end of the fifth session.

NEW SCIENCE COURSE ADAPTED FOR STUDENTS IN MEDICINE.

The special attention of students entering Medicine is directed to the enactment of the University Senate instituting a curriculum in science leading to the degree of Bachelor of Arts. This course, entitled the honour department of Biological and Physical Sciences, is specially adapted for students who intend entering eventually upon Medicine, and embraces

the purely science subjects which are demanded of students in the primary years of Medicine. It is therefore possible for a candidate who has obtained his Arts degree in this course to enter immediately the Third Year of Medicine, and he will be qualified to present himself for the degree of Bachelor of Medicine three years after graduating in Arts. In other words, it is possible for one to obtain the degrees of Bachelor of Arts and Bachelor of Medicine after seven years' study at the University.

The very great advantages of this course to a student entering Medicine are obvious. The preliminary science subjects of the course in Medicine are taught in much greater detail in the Arts course, as in the latter is included advanced laboratory and experimental work, such as is not required in the purely Medical course of studies. Further, the student is required to become proficient in modern languages, an acquirement which is of great value to the student of modern scientific Medicine.

This new course not only affords opportunity for wider culture and greater scientific attainment than is possible in the more limited four years' course in Medicine, but it fits one for a much wider field of usefulness after graduation. The graduate who has taken the science course in Arts and subsequently that of Medicine is qualified to devote his life to the purely scientific side of Medicine if he should so elect after leaving the University, and, moreover, he is undoubtedly better fitted to practice his profession should he desire to prepare himself for that alone.

Students may also combine the courses in Arts and Medicine to a less extent by proceeding to graduation in Arts through any one of the honour departments of biology, chemistry, geology and minerology and physics, certain courses and examinations in these departments being accepted as equivalent to similar courses and examinations in the faculty of Medicine.

MEDICAL COUNCIL REQUIREMENTS.

A student desirous of obtaining a license to practice medicine in Ontario must pass the joint university examination for junior matriculation in Arts, including the subjects physics

and chemistry as conducted by the Education Department of Ontario with an advanced percentage as follows: 40 per cent. minimum on each subject, and 50 per cent. on the aggregate, which entitle him to be registered as a medical student. A fifth year of study is now demanded by the Ontario Medical Council. To meet this requirement a course of instruction has been arranged; students taking this course will have the opportunity of doing special work in the hospitals and laboratories, and they will be permitted to attend whatever didactic lectures they may desire. For official information of all matters relative to the Council's regulations students should communicate directly with Dr. Bray, Registrar of the Council, 170 University Ave., Toronto.

For all information not covered by this announcement, the intending student should apply to Professor A. Primrose, The Medical Laboratories, University of Toronto.

THE MEDICAL BUILDING.

The completion of the Medical Building provides the necessary accommodation for the rapidly increasing classes.

This building, which cost $125,000, is situated between the University Library and the anatomical wing of the Biological Department. An additional $50,000 has been expended on equipment.

It is three storeys in height in front, with an additional storey and sub-basement in the wings, which extend eastward. Two large lecture rooms are provided which flank the main building; the larger has accommodation for about three hundred and fifty students; the smaller for about two hundred students.

In the south wing, in what may be called the basement storey, are situated caretaker's quarters, lavatories, recreation rooms and reading rooms for the students; in the same storey in the north wing is placed a large museum of hygiene.

The three main floors of the building are arranged upon what has been called the unit-system, a unit room being thirty feet long by twenty-three feet deep, lighted on its long face by two large windows.

These rooms may be united so as to form large laboratories or may be cut in two where it is necessary to have smaller rooms.

The south wing is occupied by the department of Physiology, whilst the main portion of the building and the north wing accommodate the final departments of Medicine.

On the ground floor in the main portion are situated in front the Dean's room, a large faculty room, a laboratory, and a library, behind is placed a large pathological museum.

In the north wing in this floor are placed a chart and preparation room behind the lecture theatre, preparation and store rooms for the pathological museum, and laboratories for gross pathology.

The second and third floors in the same wing and in front contain the laboratories of pathological histology and bacteriology with rooms for the Professor of Pathology and demonstrators, and unit rooms for small special classes.

In the north wing on the third floor units are occupied by the Provincial Board of Health for its bacteriological and chemical laboratories.

An interesting feature of the building in the provision which is made for research students by the presence of a series of small rooms in front of the south lecture room, each large enough to accommodate one or two workers.

The ventilation is of the most modern type, and each room provided with both gas and electric light.

The building in every way is thoroughly up-to-date, and in the extent of window light for the laboratories is probably unique on this continent.

COURSES OF LECTURES.

METHODS OF INSTRUCTION, WINTER SESSION, 1908-09.
CHEMISTRY.

Professor: W. R. LANG.

Professor of Physical Chemistry: W. LASH MILLER.

Associate Professor of Medical Chemistry: W. T. STUART.

Associate-Professor: F. B. KENRICK.

Associate Professor of Organic Chemistry: F. B. ALLAN.

Fellow: R. J. MANNING.

Assistants: J. F. MACKEY, A. T. STUART, H. C. COOKE, R. A. GORTNER, A. F. ODELL.

NOTE.—The junior staff is for session 1907-1908.

All lectures and practical work will be given in the Chemistry Building.

Lectures: Students attend a course of experimental lectures delivered four times a week in the large lecture theatre. This course embraces the study of the non-metallic and metallic elements and their principal compounds based on Mendelejeff's classification of the elements. In the Easter term one hour a week in the afternoon is devoted to a short course on physico-chemical methods with special reference to medical problems.

The latter part of the lecture course is devoted to Organic Chemistry. The principles of organic analyses and the basis on which the compounds of carbon are classified are explained, and the typical compounds and derivatives of the "fatty" series specially described. An elementary study of the "aromatic" series is also included in the course.

Tutorial Classes: The class is divided into sections and meets one day a week for instruction in arithmetical chemistry.

Practical Chemistry: The laboratory work commences with quantitative and qualitative experiments illustrating the fundamental principles of chemistry; this is followed by work more intimately related to analytical chemistry. Instruction in volumetric methods of analysis with special application to clinical medicine and sanitary science concludes the course.

Students working in the laboratory are provided with the necessary apparatus on making a deposit of three dollars* at the commencement of the session, which will be returned at its close after the following charges have been deducted from it:—

(1) The cost of all apparatus broken or destroyed.

(2) Any fines for breach of laboratory rules.

No certificate will be given for the practical work unless the student has passed the practical examinations conducted during the session.

*This is in addition to the fee of three dollars mentioned as "Chemical Laboratory Supply Fee," on page 161.

Text-books recommended: Remsen's College Chemistry, $2.00; or Newth's Inorganic Chemistry. Remsen's Organic Chemistry, $1.25. Physical Chemistry for Physicians and Biologists, Cohen and Fischer. An Elementary Laboratory Course in Chemistry, Kenrick and DeLury, $1.00; Outline of Qualitative Analysis, Lang, 25c.

Other books of reference recommended: Bloxam's Chemistry (inorganic and organic); Richter's Inorganic Chemistry, $1.75; Hills' Chemistry for Students of Medicine, $2.00; Bernthsen's Organic Chemistry.

SECOND YEAR, 1908-1909 ONLY.

(FOUR YEAR COURSE.)

The students of the Second year attend a course of lectures on Organic Chemistry, delivered twice a week. The principles of organic analyses and the basis on which the compounds of carbon are classified are explained, and the typical compounds and derivatives of the "fatty" series specially described. An elementary study of the "aromatic" series is also included in the course.

Text-books: Remsen's Organic Chemistry.

The laboratory work of the Second year includes elementary volumetric analysis, with special application to clinical medicine and sanitary science, and the analysis of urine; and qualitative analysis as applied in toxicology and medicine.

Students working in the laboratory are provided with the necessary apparatus on making a deposit of three dollars* at

the commencement of the session, which will be returned at its close after the following charges have been deducted from it:—

(1) The cost of all apparatus broken or destroyed.

(2) Any fines for breach of laboratory rules.

No certificate will be given for the practical work unless the student has passed the practical examinations conducted during the session.

*This is in addition to the fee of three dollars mentioned as "Chemical Laboratory Supply Fee," on page 122.

PHYSICS.

Professor and Director of the Physical Laboratory:
J. C. MCLENNAN.

Demonstrators:
E. F. BURTON.
L. GILCHRIST.

Assistant Demonstrators:
H. A. MCTAGGART.
A. M. SIMPSON.
V. E. POUND.
J. K. ROBERTSON.

Class Assistants:
J. A. GARDINER.
C. S. WRIGHT.
W. T. KENNEDY.

The work of instruction in Physics consists of a series of lectures, and a course of practical work in the laboratories.

Lectures.

The lectures on Physics will give a concise outline of the entire subject, and are intended to form a satisfactory foundation for future study in other branches of science.

The various parts will be treated in an experimental manner, and will be considered in the following order:—

1. MECHANICS:

General notions and terms, such as velocity, acceleration, mass, momentum, force, energy; together with calculations to illustrate the laws.

2. Hydrostatics:

Pressures and their transmission, specific gravity, and general properties of liquids and gases.

3. Sound:

General explanation of wave-motion, reflection and interference of sound, tuning forks, organ-pipes, strings, and the musical scale.

4. Heat:

Thermometers, expansion, specific heat, latent heat, and other ordinary phenomena.

5. Light:

Laws of reflection and refraction, mirrors, prisms, lenses, microscope and telescope, colour, double-refraction and polarization.

6. Electricity and Magnetism:

Laws of magnetism; voltaic cell, chemical, magnetic and heating effect of the electric current; induction, the induction-coil, dynamo, etc.

Practical Work.

The Practical Work, consisting of a laboratory course of fifty hours, designed to illustrate the principles dealt with in the lectures, will be conducted by a number of Demonstrators under the supervision of the Director of the Laboratory.

Regulations.

Deposit Fee: Each student taking the laboratory course is required to make a deposit of two dollars ($2.00) before commencing work. All supplies, apparatus broken or destroyed and all fines will be charged against this deposit, which must be renewed when exhausted. At the close of the session cash balances will be returned on a day appointed for the purpose.

Physics:—Text-book, Millikan and Gale, A First Course in Physics. Price, $1.25.

Book of Reference, Watson, A Text-book of Physics. Price, $2.50.

BIOLOGY.

Professor of Biology: R. RAMSAY WRIGHT.

Associate-Professor of Zoology: B. A. BENSLEY.

Lecturer in Elementary Biology and Histology: W. H. PIERSOL.

Lecturer in Zoology: E. M. WALKER.

Lecture and Laboratory Assistant: E. BOYD.

Instructor in Biology: A. G. HUNTSMAN.

Laboratory Assistant: P. M. BAYNE.

Class Assistants in Biology and Histology: M. D. MCKICHAN; A. J. MACKENZIE; E. A. MCCULLOUGH; E. C. COLE; C. M. HINCKS; I. R. BELL; A. H. ADAMS; G. W. ANDERSON;

1. Students of the First year will attend a course of lectures on general biology, to be given four times a week throughout the Michaelmas Term. This course of lectures is designed as an introduction to the whole range of biological studies. After a sketch of the scope and objects of these, the lectures will treat (1) of the fundamental principles of biology, as illustrated by the simplest animals and plants, (2) of typical forms of higher plants in ascending order, (3) of typical forms of animals in a similar order, and (4) special reference will be made to those aspects of Biology of interest to students of Medicine.

2. A practical course of fifty hours' duration is given in the Michaelmas Term, in which various types are studied and which serves as an introduction to the use of the microscope.

3. A supplementary course of twenty-five lectures is given in connection with the foregoing.

4. A course of seventy-five hours of laboratory work on Mammalian Anatomy as an introduction to Human Anatomy is given during the Michaelmas Term.

5. A course of twenty-five lectures on embryology during the Easter Term will be chiefly devoted to the development of the external form, of the organs and of the tissues of the human body, but the necessary comparative data for the proper understanding of these will be supplied by reference to the embryology of the lower vertebrates. The student may consult the large collection of models of embryology in the

Museum, which are now furnished with explanatory labels designed to supplement the instruction given in the lectures.

6. A course of twenty-five lectures on Histology, designed to cover its general principles and the more intricate problems of Human Histology.

7. A course of one hundred hours laboratory work. The student will learn the methods used in Histology and will apply them in his study of General Histology. A selected series of embryological specimens illustrative of the lectures on that subject will also be examined.

8. A course of fifty hours laboratory work in Special Human Histology. The student will have the opportunity of providing himself with a set of typical histological specimens.

THE BIOLOGICAL MUSEUM.

The University Biological Museum forms the central portion of the Biological Buildings. It is primarily intended as an educational Museum for the students taking biology as part of their University work. It is arranged in such a way as to facilitate the most elementary as well as the most advanced studies, each specimen, as far as possible, being furnished with a printed label indicating the most salient points which it is designed to illustrate. The Museum, however, being open every afternoon, is also of great interest to the general public and attracts even greater numbers of visitors than the old Natural History Museum in the University Building.

The public entrance to the Museum is situated in the west façade of the Biological Buildings, while the students gain access to the rooms through the eastern wing, in which the laboratories are located. The interior of the Museum, which occupies two floors, is sub-divided into four rooms, seventy-five by twenty-five feet in size, amply lighted by handsome windows on the north and south sides. Three of these rooms are devoted to Animal Biology, while the fourth is being arranged for the illustration of Vegetable Biology.

The public entrance opens into the north ground-floor room, the wall-cases in which contain stuffed specimens of the various orders of Mammals, while the free standing cases

between the windows illustrate the comparative anatomy and development of that class. All the show-cases are constructed of iron and plate-glass, those destined for the exhibition of smaller specimens standing on wooden storage-cases, built of cherry and cedar, and containing skins and other specimens for private study. The south ground-floor room is devoted to the remaining vertebrate classes, the wall-cases containing stuffed specimens of birds, reptiles, batrachians and fishes, and the smaller cases between the windows containing specimens illustrating the comparative anatomy and development of these classes.

A handsome staircase decorated with busts of distinguished biologists connects the ground floor and the first floor; a number of wall-cases in ascending series contains a small collection of fossils from all parts of the world, as a graphic illustration of the relative position of the fossiliferous strata, and of their characteristic remains.

The south first floor contains illustrative specimens of all the remaining branches of the animal kingdom, the arthropods and molluscs being exhibited in the wall-cases and the table cases standing in the alcoves of these, while the protozoa, sponges, cœlenterates, echinoderms or worms are accommodated in the cases between the windows.

Although the Natural History Museum suffered considerable losses on the occasion of the University fire, these fortunately did not involve the large collection of models and specimens most useful from the educational point of view, while the generosity of public bodies and private individuals has largely repaired the losses referred to, so that the Museum will be found to constitute a most important addition to the instruction furnished in the lecture rooms and laboratories.

PHYSIOLOGY AND PHYSIOLOGICAL CHEMISTRY.

Professor of Physiology and Physiological Chemistry: A. B. MACALLUM.

Demonstrator: F. R. MILLER.

Demonstrator in Applied Physiology: W. GOLDIE; C. J. WAGNER.

Assistant Demonstrators: W. F. M. ADAMS; W. H. CRONYN; E. FIDLAR; R. G. ARMOUR; I. R. BELL; F. C. HARRISON; P. B. MACFARLANE; C. E. ROWLAND; J. R. G. MURRAY; L. B. ROBERTSON; A. BRUCE MACALLUM; W. J. M. MARCY; C. B. PARKER.

The following courses of instruction are given in Physiology and Physiological Chemistry.

1. A course of ninety lectures on Physiology to be given to students of the Second Year who are following the five years' curriculum.

2. A laboratory course devoted to Experimental Physiology, equivalent to five hours a week throughout the session, will be required of each student taking course No. 1. For this purpose the class will be divided into groups of two, each couple of students working together on the whole course of experiments and throughout the period allotted for the same. Each group will be given the complete set of instruments necessary to carry out all the experiments required in the course, and will be expected to preserve for inspection all the graphic records which they may obtain. Each student will be expected to be thoroughly familiar with the proper use of all the apparatus given him.

3. A course of ninety lectures on Physiological Chemistry for students of the Second Year, who are following the five years' curriculum.

4. A laboratory course of six hours a week throughout the session, devoted to Physiological Chemistry and for students who are taking course No. 3.

5. An advanced course of lectures, four a week throughout the session, for the students of the Second Year who are following the four years' (expiring) curriculum. It will comprehend the subjects, Physiology and Physiological Chemistry, and it will be specially adapted to the course of laboratory work which also each student is required to take. The course

of lectures will begin with a discussion of the characters and classification of the more important chemical compounds of physiological origin, but subsequently, the chemistry of the tissues, and of the various physiological fluids and excretions will be fully discussed in their natural order in the lectures on the functions of the organs.

6. An advanced laboratory course of six hours a week throughout the session is required of each student who takes the advanced course of lectures on Physiology and Physiological Chemistry. This course is devoted to the physiology of nutrition, respiration, hearing, vision, and of the nervous system, to the practical examination of the chemistry of physiological compounds, of blood, lymph, muscle, the digestive fluids, bile, and urine, and the student will be expected to acquire a practical knowledge of the methods of Volumetric Analysis employed in the estimation of chlorides, and phosphates, and nitrogen in physiological fluids, and in the estimation of sugar, urea and uric acid. The course in Hæmatology will comprehend the various methods of estimating the number of corpuscles of different kinds and of determining the amount of hæmoglobin. For all these purposes the laboratories for Physiological Chemistry are specially arranged.

Every student of the Second Year must attain a certain standard in the laboratory exercises in Physiology and Physiological Chemistry before he will be allowed to proceed to the University examinations in Physiology and Physiological Chemistry.

From time to time test examinations will be held to determine the student's practical knowledge and the results of these as well as of his general work in the laboratory will be used to determine his position in the University class lists.

In the primary and advanced courses the student will be required to make good all loss through breakage or otherwise.

Physiology:—Howell, Text-book of Physiology, $4.00; Stewart, Text-book of Physiology, $3.75; Tigerstedt's Physiology, trans. by Murlin; Schäfer, Text-book of Physiology, 2 vols., $18.00; Halliburton, Hand-book of Physiology (English edition), $3.00; Brubaker's Physiology.

ANATOMY.

Professor and Director of the Anatomical Department: J. Playfair McMurrich.

Associate Professor: H. W. Aikins.

Associate Professor of Clinical Anatomy: G. A. Bingham.

Senior Demonstrator: C. B. Shuttleworth.

Assistant Demonstrators: W. J. O. Malloch; S. H. Westman; R. E. Hooper; A. C. Hendrick; A. J. McKenzie; F. W. Marlow; W. A. Scott; C. J. Copp; G. E. Smith; W. B. Hendry; W. E. Gallie; A. W. Canfield; W. W. Jones; O. T. Dinnick.

Lectures: For the students of the First Year a course of lectures will be given in Osteology, including the Anatomy of the Articulations and in the Second Year a course will be given in which the various organs of the body will be considered from the structural and topographic standpoints, a special course being given on the Anatomy of the Central Nervous System. In all these courses attention will be given to the developmental and comparative significance of the organs, the endeavour being to present an explanation as well as a clear picture of the structure and relations of the parts of the body. The lectures will be illustrated by special preparations, as well as by diagrams and drawings, and a projection apparatus will be employed for demonstrating photographs taken from the valuable preparations displayed for study in the Museum as well as of actual preparations.

Tutorial instruction will be given in Osteology, the class being divided into small sections for this purpose. Arrangements have been perfected by which each student may obtain bones from the Osteological store room for private study.

A course of lectures will also be given for students of the Third and Fourth years. This course will consist of a systematic study of the regional anatomy of the human body as applied in the practice of medicine and surgery. The lectures will be illustrated by suitable preparations, and a series of demonstrations of landmarks will be conducted on the living subject.

Dissection: The dissecting-room will be open daily from 9 a.m. until 6 p.m. on Monday, Tuesday, Wednesday, Thursday and Friday, and from 9 a.m. until 12 noon on Saturday. Stu-

dents will be required to conduct their work in a systematic manner and to conform to the regulations in force in the dissecting-room. One or more of the Assistant-Demonstrators will be in attendance at all times for the purpose of superintending the work of the students, and of giving instruction. Examinations will be conducted from time to time on the parts dissected, and marks allotted for the work done. Certificates for work in practical anatomy are granted to such students only as have obtained the requisite number of marks in the examinations.

The dissecting-room is admirably adapted for the purposes of practical anatomy. It is large and well ventilated, and is equipped in such a manner as to afford every possible comfort and convenience to the student. Each student is provided with a locker for his private use. A notable feature of the dissecting-room is the excellent light, the room being lighted from the roof through extensive sky-lights, and when sunlight fails, electricity is employed with equally good effect.

Museum: In connection with the dissecting-room a series of preparations have been mounted for the purpose of study. The disarticulated bones of the skeleton are included in this collection, together with frozen sections of the human body; wet preparations, illustrating regional anatomy, are also provided. A valuable and instructive series of Steger's models of frozen sections prepared by His are exhibited in the Museum, together with a complete series of dissections of the brain and other preparations. Cunningham's series of models illustrating the topographical anatomy of the brain are also exhibited.

Instructions for students of the Second year for 1908-09 only will be as follows.

MATERIA MEDICA AND THERAPEUTICS.

Lecturer in Pharmacy and Pharmacology: V. E. Henderson.

Demonstrator of Pharmacy and Pharmacology: C. P. Lusk.

Class Assistants in Pharmacy and Pharmacology: W. H. Cronyn; R. G. Armour; F. C. Harrison; P. B. MacFarlane; A. W. M. Ellis; W. J. M. Marcy.

The course in therapeutics includes: 1. General therapeutics of the nature and action of remedies generally. 2. The various forms in which medicines are administered, and the channels through which they are introduced into the system. 3. Diet, hydrotherapy, massage, electricity and climate will also be dealt with. 4. Special therapeutics of the various organs of the body. This is treated in a practical and rational manner from the standpoint of the pathological conditions underlying disease, and will be accompanied in as far as possible by clinical demonstrations.

There will be two courses of lectures in the Second year. The first course will include Materia Medica and Pharmacy. The work will be demonstrative in character, the student being familiarized with the important drugs and their preparations by daily demonstrations in the class room. The demonstrations will include the important non-official as well as the official drugs.

The method of preparing the different groups of preparations, tinctures, ointments, suppositories, etc., will be shown to the class as far as is practically necessary.

The general principles of posology, the factors modifying the doses of drugs will also be considered, and the writing of prescriptions with a view to the practical application of the course.

A short experimental and practical course in incompatibility and in the practice of dispensing will accompany the above lecture course and thus give the student an insight into its practical bearings.

The Second course of lectures will be on the pharmacological actions of the official and important non-official drugs.

A practical experimental course with special demonstrations will accompany the above lecture course. Each student will thus have an opportunity to test for himself the pharmacological action of some of the more important drugs. The

drugs thus studied will in as far as possible be typical of the various pharmacological groups.

The Department possesses a very complete collection of crude and prepared drugs. These specimens are made use of in illustrating the lecture and are displayed for inspection by the students in suitable glass cases.

Pharmacology and Pharmacy:—Cushny, Pharmacology, $3.75; Sollmann, Pharmacology, $3.75; Dixon, $3.75; Mitchell Bruce, Materia Medica and Therapeutics, $1.50; Heebner's Synopsis, $1.50.

Therapeutics:—Yeo's Clinical Therapeutics, 2 vols., $5.00; Hare's Practical Therapeutics, $4.00; Lauder Brunton, On the Action of Medicines.

MEDICINE.

Professor of Medicine and Clinical Medicine: A. McPHEDRAN.

Associate Professors of Medicine: R. D. RUDOLF; J. T. FOTHERINGHAM.

Professor of Clinical Medicine: J. L. DAVISON.

Associate Professors of Clinical Medicine: ALLAN M. BAINES; W. P. CAVEN; W. B. THISTLE; J. T. FOTHERINGHAM; A. R. GORDON; R. J. DWYER; H. B. ANDERSON.

Associates in Clinical Medicine: R. D. RUDOLF; G. CHAMBERS; H. C. PARSONS; W. GOLDIE; F. FENTON.

Demonstrators in Medicine: D. McGILLIVRAY; T. D. ARCHBALD; G. W. HOWLAND; W. J. McCOLLUM.

Assistant in Clinical Medicine: E. C. BURSON; C. J. WAGNER; H. S. HUTCHISON; B. O'REILLY.

Demonstrator in Dermatology: D. K. SMITH.

These lectures are devoted to the consideration of the general principles of medicine and to the discussion of the internal diseases met with in this climate. When the subjects under consideration can be demonstrated to the whole class patients will be presented to illustrate the lectures. This method has been found of the greatest advantage. The wards and out-patient rooms of the several hospitals afford facilities for demonstrations to smaller classes. The lectures are also illustrated by lantern-slides, models, etc., from the Museum, and by morbid specimens from the Pathological Department.

The teaching in Clinical Medicine is carried on at the Toronto General and St. Michael's Hospitals and the Victoria Hospital for Sick Children.

I.—The Students of the Third Year are given instruction as follows:—

(1) In physical diagnosis, and methods of examining patients.

(2) In case-taking, they are required to report cases in the out-patient departments and wards of the hospitals.

(3) In the treatment of the more common diseases.

(4) A systematic course in clinical laboratory methods.

II.—The Graduating Class will receive instruction as follows:—

(1) Clinical lectures in the hospital theatres.

(2) Clinical instruction in small classes in the wards of the hospitals.

(3) In preparing accurate histories and carrying out the requisite laboratory investigations of the cases assigned to them.

(4) Instruction in the various therapeutic means applicable to the cases under observation.

DISEASES OF CHILDREN.

This course comprises lectures to Third and Fourth year students on such subjects as diseases of the newly-born, infant feeding, diseases of the digestive system, the acute infectious diseases, etc. Daily clinics are held at the Hospital for Sick Children on medical and surgical cases.

PREVENTIVE MEDICINE.

Professor of Preventive Medicine, Didactic and Clinical: C. Sheard.

The course will consist of not more than 15 didactic and not less than 50 clinical lectures on the subject of Preventive Medicine, including instruction on the Exanthemata.

Contagion and infection, management of epidemics and quarantine will be dealt with.

SURGERY.

Professors of Surgery and Clinical Surgery:
I. H. CAMERON; F. LEM. GRASETT; L. TESKEY.

Associate Professor of Clinical Surgery and Clinical Anatomy:
G. A. BINGHAM.

Associate Professors of Clinical Surgery: A. PRIMROSE; N. A. POWELL; W. OLDRIGHT; H. A. BRUCE; F. N. G. STARR.

Associate Professor of Clinical Surgery in Charge of Orthopædics:
C. L. STARR.

Demonstrators in Clinical Surgery: P. W. H. MCKEOWN; C. A. TEMPLE; A. H. GARRATT; C. B. SHUTTLEWORTH; T. B. RICHARDSON; J. F. UREN; G. SILVERTHORN; E. S. RYERSON; W. J. O. MALLOCH; S. H. WESTMAN; W. A. SCOTT; W. W. JONES; S. JOHNSTON.

This course of lectures comprehends:—

1. The general principles of surgery, as based upon what is known as: (*a*) The natural history of diseases of a surgical character as they affect the human frame, as, for example, abscess, ulceration, mortification, tumours, etc.; (*b*) The processes of repair and regeneration taking place in tissues, which have been diseased, such as the healing of wounds, the expulsion of foreign bodies, as bullets, dead bone, etc.; and (*c*) The part played in the economy by micro-organisms, involving a consideration of the germ theory of disease.

2. Surgical Injuries.
   (*a*) Of tissues, as fractures, dislocations, and injuries to nerves, blood vessels, etc.
   (*b*) Of organs contained in the so-called cavities of the body, the brain, lungs and abdominal viscera.

3. Surgical diseases, as aneurism, varicose veins, calculus in the kidney or bladder, hernia, tuberculous disease of joints, bones, testicles, etc., pyæmia, erysipelas, etc.

4. The correction of malformations, deformities and defects, as club-foot, spinal curvatures, hare-lip, cleft-palate and other conditions usually classified under the headings of orthopædic and plastic surgery.

The course will be illustrated by plates and drawings, by specimens from the Museum and fresh specimens from the operating and post-mortem rooms, and by special reference to clinical cases falling under the immediate observation of the students in the wards of the hospitals.

CLINICAL SURGERY.

In teaching clinical surgery, an effort is made to give as much personal instruction to each student as possible, and whenever it is practicable he is permitted to make a careful examination of the patients brought before the class. In order to facilitate this the classes are made small, and are graded to some extent according to the degree of advancement of the students in their studies. Whenever dressings are done and apparatus applied in the presence of the classes, each step of the proceeding is explained by the surgeon and the clinical clerks and dressers participate in the actual work.

During his course, each student has an opportunity of acting as clinical clerk and dresser, thus being afforded facilities for coming into that immediate contact with the patient which is so important from the point of view of practice and which lends so much additional interest to the cases in his charge.

The material available for the instruction of students is abundant, consisting of out-door and in-door patients in the Toronto General Hospital, St. Michael's Hospital and the Hospital for Sick Children. In the last-named institution may be found cases, in great numbers and varieties, illustrating all the diseases, deformities and defects, such as club-foot, hare-lip, hip-joint disease, Pott's disease, and other conditions met with most frequently in the young.

A course of practical demonstrations in the technique of antiseptic surgery and wound treatment, the methods of surgical anæsthesia, general or local; the preparation and application of retentive apparatus in fractures, and allied subjects will be given to the Third year. Bandaging and other details of minor surgery will form a part of the course.

PATHOLOGY.

Professor of Pathology and Bacteriology and Curator of the Museum and Laboratories: J. J. MACKENZIE.

Associate Professor of Pathology and Bacteriology: J. A. AMYOT.

Laboratory Assistant in Bacteriology: T. D. ARCHIBALD.

Demonstrators of Pathology: G. SILVERTHORN; C. J. WAGNER.

Assistant Demonstrators in Pathology: W. H. PEPLER; H. C. PARSONS; F. A. CLARKSON; E. S. RYERSON; G. W. HOWLAND; H. S. HUTCHISON; B. R. O'REILLY; J. GRAHAM.

Assistants in Clinical Laboratory: M. H. V. CAMERON; J. H. MCPHEDRAN.

Assistant Curator of Pathological Museum: E. S. RYERSON.

The course embraces lectures on general and special pathology, with demonstrations in gross morbid anatomy and pathological histology. The lectures of the Third year students will be mainly upon general pathology and bacteriology, and those to the students of the Fourth year, upon special pathology. Post-mortem examinations are performed by the Professor of Pathology at the General Hospital, and the students of the Fourth year will be expected to take part in these. Gross demonstrations are given in the Hospital mortuary and in the Pathological Laboratory, not only upon fresh material obtained from the hospitals, but upon materials obtained at other institutions in the city and upon specimens from the pathological museum.

The Pathological Laboratory is fully equipped with microscopes and other apparatus necessary for the study of pathological histology, and students of both years prepare and study about one hundred and fifty specimens of morbid tissue, the Third year students devoting their time to work in general pathology, whilst students of the Fourth year study the special pathological histology of the organs.

The clinical laboratories are under the charge of two assistants who are in constant attendance to give advice and instruction to students in their work in the examination of urine, blood, stomach contents, sputum, etc., and full records of the work of each student are preserved.

The pathological museum contains about two thousand specimens and is constantly growing, and students are given

access to the cases and are expected to make as full use of the specimens as possible in their reading.

Classes in bacteriology are held every afternoon throughout the session, and the students of the Third year are subdivided so as to give each student about eight weeks' continuous work in the bacteriological laboratory.

HYGIENE.

Professor: W. OLDRIGHT.

The student is recommended to obtain from one of the works mentioned in the list of text-books a knowledge of the subject of the next succeeding lecture. The information thus obtained will be supplemented in the lectures, and fuller consideration given to those points which require special attention on account of differences of climate, population, occupations, social and political organization, and other circumstances in Canada. Students are also guided in regard to sources of information and current literature relating to health work in this country, and as to visits to some outside institutions for practical observations of matters pertaining to Hygiene.

In addition to the theoretical teaching, practical demonstrations are given by means of various instruments and apparatus. The following subjects are embraced in the course: air, impurities and their effects, ventilation and heating; hygiene architecture; climatology; sewerage and disposal of refuse; water supplies; foods, dietaries, adulterations; occupations, physical and mental exercise and overwork; clothing; baths; duties and functions of medical officers of health and boards of health; vital statistics; sanitary law—federal, provincial and municipal.

The Museum of Hygiene.

The Museum of Hygiene is on the lowest floor of the north-eastern portion of the Medical Building, the direct entrance being through the eastern door of the north-east wing. It contains, in classified arrangement, samples, models, drawings and lantern slides illustrating ventilation, heating,

thermostatic regulation, plumbing, drainage, disposal of sewage and other waste products, appliances in connection with water supply, baths, etc., examination of air and foods, meterological instruments, fire-proof lathing and roofing, stair and other building materials, models of infectious diseases hospitals and tents, and furnishings for the same, clothing and other matters of sanitary interest. It has recently been fitted up with water supply and facilities for the removal of waste water.

Many of the articles exhibited have been contributed, and the curator appeals to manufacturers, engineers, architects, builders, plumbers and other persons interested in sanitary and domestic science, with the object of increasing the collection of such articles as may be of interest from a sanitary point of view.

In addition to new and ideal appliances, old specimens of plumbing, water pipes, etc., illustrating defects leading to insanitary conditions, are on exhibition, and are gladly received.

Visitors desirous of seeing the collection are welcome to do so on application to the janitor.

TOXICOLOGY.

Professor: W. H. ELLIS.

A series of lectures and demonstrations on toxicology is given under the following heads:—

THE NATURE OF POISONS.

Their properties, physical, chemical and physiological

THE OCCURRENCE OF POISONS.

In nature, in the arts, and in common life. Danger from poisoning incidental to particular callings. Genesis of poisons in the dead and in the living body.

ANTIDOTES TO POISONS.

THE DETECTION OF POISONS.

Identification of poisons in the pure state. Separation from organic matter.

Post-mortem examinations for poisons.

MEDICAL JURISPRUDENCE.

Professor: N. A. POWELL.

The course will embrace *inter alia* a discussion of the medico-legal aspects of the following subjects:—

Medical evidence, ordinary and expert; inquests.

Thanatology—Signs of the reality of death; *post mortem* changes; autopsies and reports.

Presumption of death and of survivorship.

Personal identity of the living and of the dead.

Causes producing violent death, such as wounds, burns and scalds, heat or cold, lightning and electricity.

Strangulation, hanging, drowning, suffocation, starvation, feigned diseases, malingerings.

Medico-legal aspects of pregnancy.

Criminal abortion, infanticide, live birth, legitimacy, impotency and sterility.

Rape and allied offences against chastity.

Life assurance; medical ethics.

Civil and criminal malpractice.

MENTAL DISEASES.

Professor of Psychiatry: C. K. CLARKE.

Extra-Mural Professor: N. H. BEEMER.

Demonstrators: J. G. FITZGERALD; W. K. ROSS.

The course of lectures will be partly didactic, given in the lecture-rooms, and partly clinical, given at the Toronto Asylums. The subjects discussed will be altogether practical, and will embrace the following:—

1st. Definitions of terms in common use, and the reasons for their frequent misapplication.

2nd. Leading conditions in which a knowledge of mental diseases is necessary.

3rd. Groundwork of various classifications of mental diseases.

4th. Causes of mental diseases.

5th. Principal forms of mental diseases, with clinical illustrations.

6th. Special forms for mental diseases, with examples.

7th. Essential observations in making medical certificates, and methods of admittance to institutions.

8th. Treatment of various forms of mental diseases.

OBSTETRICS, GYNAECOLOGY AND PEDIATRICS.

Professor of Gynæcology and Operative Obstetrics: J. ALGERNON TEMPLE.

Professor of Obstetrics: A. H. WRIGHT.

Professor of Gynæcology: J. F. W. ROSS.

Associate Professor of Obstetrics and Pediatrics: H. T. MACHELL.

Associate Professor of Pediatrics: A. M. BAINES.

Associates in Obstetrics: K. C. MCILWRAITH; F. FENTON.

Demonstrator in Gynæcology: F. W. MARLOW.

Demonstrator in Obstetrics: J. A. KINNEAR.

There will be two separate courses in obstetrics; one for the students of the Third year in physiological obstetrics, and the other for students of the Fourth year in pathological obstetrics.

The Third year course in physiological obstetrics will include the following: anatomy and physiology of the female organs of reproduction; physiology of pregnancy; physiology, mechanism, and management of labour; management of the puerperal state; management of the infant.

The Fourth year course on pathological obstetrics will include: diseases of pregnancy, abortion and premature labour dystocia, accidents before and after delivery, obstetrical operations, puerperal diseases, including septicæmia.

Practical demonstrations will be given on the phantom or cadaver, and diagrams, specimens, models, etc., will be used in illustrating the various subjects treated of in the two courses.

In the department of Gynæcology instruction will be given on the various methods of examination and diagnosis; the use and application of instruments; and the symptoms, diagnosis and treatment of diseases peculiar to women.

The disorders of menstruation, leucorrhœa, chlorsis, metritis in its various forms, tumours, displacements and diseases

of the uterus and ovaries, laceration of the cervix uteri and perineum, and abdominal surgery, will be treated of and illustrated by large plates, casts and morbid specimens in the didactic course, while operative gynæcology will be demonstrated in the Clinics in the Toronto General Hospital.

A special course of instruction in Disease in Children will be conducted by the Associate Professor of Ostetrics and Pediatrics. He will be assisted in the clinical work by other members of the Faculty who are on the staff of the Hospital for Sick Children.

OPHTHALMOLOGY AND OTOLOGY.

Professors: R. A. Reeve; G. S. Ryerson; G. H. Burnham.
Associate Professor: C. Trow.
Associate: J. M. MacCallum.

In addition to the short course of didactic lectures on Diseases of the Eye and Ear at the University, practical instruction will be given four times in the week at the clinics in the Provincial (Mercer) Eye and Ear Infirmary, Toronto General Hospital.

LARYNGOLOGY AND RHINOLOGY.

Professor: G. R. McDonagh.
Associate-Professor: D. J. Gibb Wishart.
Associate: Geoffrey Boyd.

In the department of Laryngology and Rhinology, a course of didactic lectures on the more common forms of disease in the Throat and Nose will be given in the Medical Faculty Building and there will be clinical teaching with opportunities for examining patients on five days each week during the session, at the General Hospital.

THE TORONTO GENERAL HOSPITAL.

The following members of the Faculty are members of the staff of the Toronto General Hospital.

Consulting.

PROF. J. H. RICHARDSON, M.D.
PROF. U. OGDEN, M.D.
PROF. DAVISON, M.D.
PROF. L. TESKEY, M.D.

Senior Assistant.....D. ANDERSON, M.D.

Electrical Department.

Chief of Service.....C. R. DICKSON, M.B.
Senior Assistant .....GEO. BALMER, M.B.

Members of the Active Staff without Service.

PROF. J. A. TEMPLE, M.D.
PROF. F. LEM. GRASETT, M.D., F.R.C.S.

Pathologist

PROF. J. J. MACKENZIE, B.A., M.B.

The Hospital has now 425 beds, and during the year the number of in-patients under treatment has varied from 250 to 300. During last year about 3,300 patients were admitted, and 16,000 patients received treatment in the out-door department.

All the patients in the Hospital are, as a rule, suffering from acute medical or surgical disease; the chronic cases are generally sent to the Home of Incurables or House of Providence, and the convalescent patients are sent to the Convalescent Home, recently enlarged on Well's Hill.

Clinical Training.

Clinical instruction is given in the various departments of the Hospital on all classes of patients.

I. *Theatre Lectures*:—Clinical Lectures are given on patients brought from the wards to the large theatre, by the professors of clinical medicine and of clinical surgery to the students of the Third and Fourth years.

II. *Instruction in the Wards*:—

(*a*) Medicine and Surgery:—A systematic course of bedside instruction is given to a limited class of students. Arrangements are such that each physician and surgeon or his assistant is in daily attendance for the purpose of imparting instruction at the bedside. By this means provision is made for continuous daily work in the ward, and students of both Third and Fourth years are required to avail themselves of it.

(*b*) Gynæcology:—Small classes of students receive instruction in diseases peculiar to women in the pavilion specially devoted to the treatment of such patients. These classes meet twice a week. Increased facilities have recently been provided for an out-door gynæcological clinic.

(*c*) Obstetrics:—In the Burnside Lying-in Hospital, in which there are over 200 births a year, final students are permitted to witness and assist in the conduct of *labours*. Students are also allowed to make engagements with out-patients and to attend them in confinements at their own home.

(*d*) Ophthalmology, Otology, Laryngology and Rhinology:—Diseases of the eye, ear, throat and nose are studied in the wards of the Andrew Mercer Infirmary.

III. *Surgical Operations*:—Surgical operations are performed in the large theatre every morning, or in cases of emergency at any time during the day or night when required. The theatre, which has recently been altered and enlarged, is capable of seating a large number of students, and in the completeness of its arrangements is not excelled. The facilities afforded the students situated in all parts of the room for witnessing operations in all their details are unusually good.

IV. *Out-patients Clinics*:—The recent provision which has been made for the accommodation of out-patients will afford unsurpassed facilities for instruction in the important class

of diseases which here pass under observation. A physician and a surgeon are in attendance daily, and the patients serve to illustrate the instruction. The cases presenting themselves in the special departments of the Hospital devoted to diseases of the eye, ear, etc., are available in the same manner. There will also be an out-door clinic in gynæcology.

V. *Pathology*:—

(*a*) Autopsies:—These are performed at stated hours by the Professor, or the Demonstrator of Pathology. The examinations are conducted in a systematic way, and instruction on the morbid conditions found is imparted to the students. The bearings of the gross post-mortem appearances on the conditions previously found at the bedside are carefully investigated, and, when necessary, arrangements are made for further examination, microscopical and chemical. There are about 200 autopsies during the year. Recently the theatre in which autopsies are made has been completely remodelled and every facility is provided for conducting the examinations. The light is excellent and the room capable of accommodating 150 students.

(*b*) The examination and analysis of the various fluids, excreta and pathological products of patients in the wards, are conducted in the University Hospital laboratory. Students are required to keep systematic records of the results obtained by these examinations.

Clinical Clerks and Surgical Dressers.

Clinical clerks and surgical dressers are appointed to act for limited periods. They are required to take complete histories of cases allotted to them, and to receive certificates for the same, as required by the Ontario Medical Council. Post-mortem clerks are appointed, and are required to make complete reports of all autopsies made in the post-mortem room, which is situated in the Hospital grounds. Clinical clerks and surgical dressers are also appointed in the departments of gynæcology, ophthalmology and otology.

Every student in the Department of Surgery shall be required to take the history, attend the dressing and keep the record of six cases in the Ward.

If any such cases come to operation he shall attend the same, disinfect himself, don an operating gown and come within the pale of the theatre to render such assistance as may be required of him, and to record the facts of the operation and the result. If any such come to post-mortem examination he shall attend the same, render such assistance as may be required of him and record the findings.

Students in Clinical Medicine shall be required to observe this last regulation respecting attendance at post-mortem examinations.

Resident Assistants in the Hospital.

A number of resident assistants are appointed annually from the graduates in medicine of the University, and hold their positions for one year. They will have full opportunities for acquiring experience in the general and special wards of the Hospital, and during the session they will have charge under the physicians and surgeons in the general wards.

The Appointment of Students of the Fifth Year.

Certain junior positions on the House Staff of the Toronto General Hospital will be available for students in the Fifth Year, and selection of suitable men for these positions will be made in a similar manner to that adopted in connection with the Senior House Appointments. Any candidate wishing to apply for such position should make formal application to the Hospital authorities, addressing his communication to the Secretary of the Toronto General Hospital.

This large Hospital, with 160 beds, is entirely devoted to disease in children. In the clinics cases exemplifying the various diseases in infancy and childhood will be exhibited. Abundant opportunities for a personal examination of all cases will be afforded.

Resident assistants are appointed annually from the graduates in medicine of the University, and hold their position for the year. The opportunity thus afforded for obtaining a practical knowledge of this very important department of medical practice is unsurpassed.

For the current year the resident assistants are:—

R. E. WODEHOUSE, M.B.
R. A. JONES, M.B.
F. W. MANNING, M.B.
A. W. MCPHERSON, M.B.
J. MCLACHLAN, M.B.

W. J. MCCOLLUM, M.B.
C. B. SHUTTLEWORTH, M.D.

This institution is conducted as a General Hospital, where medical, surgical and obstetrical cases are admitted. The number of patients admitted last year was about 1,500. The accommodation has recently been enlarged by the addition of a new wing, so that there are now 160 beds. An operating theatre has been provided, constructed with all the necessary modern equipment for the practice of antiseptic surgery.

Clinical instruction is given in this Hospital by those members of the staff who are also on the teaching staff of the University of Toronto. Opportunity is also provided for the study of Pathology. Post-mortem examinations are conducted systematically so that students may avail themselves of the material in this department. Clinical clerks and surgical dressers are appointed from the students in attendance at the Hospital.

Resident assistants are appointed annually from the graduates in Medicine of the University of Toronto.

For the current year they are:—

F. A. ROBERT, M.B.
E. E. CLEAVER, M.B.
F. J. N. MAGWOOD, M.B.
W. A. PEART, M.B.

TEXTBOOKS.

Disease in Children:—Holt, $6; Goodhart and Still, $3.50; Koplick, $4; Dawson Williams, $3.50; Taylor and Wells, $4; Diseases of Children, Pfanndler & Schlossman, edited by Shaw & Lafétra, $2; Reference Hand Book, Frühwald, $4.50; Treatment of Diseases of Children, Kerby, $5; Rotch, $7; Fischer, $7; The Practice of Pediatrica, Walter Lester Carr, $6; Filator, $7.

Medicine:—Osler, $5; Munro, $3.75; Churchill and Peterson, Nervous System, $5; Forcheimer's Treatment of Internal Diseases; Diseases of Metabolism, Van Noorden; Diseases of the Stomach, Boas; Treatment of Internal Diseases, Ortner.

Clinical Methods and Diagnosis:—Sahli's Diagnostic Method, . . ; Hutchison & Rainy, Clinical Methods, $2.50; Simon, Clinical Diagnosis, 5th edit., $4.

Dermatology:—Crocker, $4.50; Stelwagon, $5.

Hygiene:—Parkes and Kenwood, $3; Egbert, $2.25; Wilson, $3; Harrington's Practical Hygiene, $4.25; Clatter & Firth, $1.50. For reference—Bergey, $3; Stevenson and Murphy, vols. 1 and 2, $12; DeChaumont's Parkes, $4; Abbott's Hygiene of Transmissible Disease, $2.50; Principles of Sanitary Science and Public Health, Sedgwick's $3; Thresh on Water Supplies, $2.

Mental Diseases:—T. S. Clouston, $4.50; Emil Kraepelin, $4; Henry J. Berkley, $5; Stewart Paton, $4; Clinical Psychiatry; Diefendorf; Text Book of Psychiatry, Emendel.

Anatomy:—Morris' Human Anatomy, $6; Piersol's Human Anatomy, $7; Cunningham's Text-book, $6; Gray, $6.25; Quain; Cunningham's Practical Anatomy, 2 vols., $5; Holden's Anatomy, 2 vols.; Buchanan's Manual of Anatomy, 2 vols.; Spalteholz, Hand-Atlas of Human Anatomy, $10; Toldt's Atlas of Human Anatomy; Sobotta's Atlas and Text-book of Human Anatomy, $18; McMurrich's Development of the Human Body, $3; Barker's The Nervous System, $5; Sautee, Anatomy of the Brain and Spinal Cord; Johnston, Nervous System of Vertebrates; Schultze-Stewart, Atlas of Topographical Anatomy; Eisendrath's Clinical Anatomy; Treves' Applied Anatomy; Von Bardeleben's Handbuch der Anatomie.

Physiology:—Howell, Text-book of Physiology, $4; Waller, $4; Stewart, $3.75; Tigarstedt's Physiology, trans. by Murlin; Text-book of Physiology, edited by E. A. Schäfer, 2 vols., $18; Hall's Text-book of Physiology, $4; Chapman's Physiology, $4.25; Kirk's Physiology, edited by Halliburton (English edition), $3; Brubaker's Physiology; Physiology, Otts.

Histology:—Böhm, v. Davidoff and Huber, Text-book of Histology, 2nd ed., $3.50; Szymonowicz and MacCallum, Text-book of Histology and Microscopic Anatomy, $4.75; Sobotta and Huber, Hand Atlas of Human Histology and Microscopic Anatomy, $4.50. Text-book of Histology, Bailey; Normal Histology and Microscopic Anatomy, Ferguson.

Embryology:—Minot, Human Embryology; Minot, Laboratory Text-book of Embryology; McMurrich, Manual of Embryology.

Chemistry:—Remsen College Chemistry, $2.25, or Newth, Inorganic Chemistry; Remsen, Organic Chemistry, $1.25. Other books of reference recommended: Bloxam's Chemistry (Inorganic and Organic); Richter, Inorganic Chemistry, $1.75; Hills, Chemistry for Students of Medicine, $3; Bernthsen's Organic Chemistry sup., 59.

Pharmacology and Pharmacy:—Cushny, Pharmacology, $3.75; Sollmann, Pharmacology, $3.75; Mitchell Bruce, Materia Medica and Therapeutics, $1.50; Heebner's Synopsis, $1.50.

Therapeutics:—Yeo's Clinical Therapeutics, 2 vols., $5; Hare's Practical Therapeutics, $4; Lauder Brunton, On the Action of Medicines.

Surgery:—Principles of, by Senn, Nancrede, Jackson Clarke; Practice of, by Treves, Erichsen, International Text Book, by Warren & Gould; Manuals, by Rose & Carless, Stewart (1907), Modern Surgery, by Roswell Park, American Text Book of Surgery; Surgical Treatment, Cheyne & Burghard; Operative Surgery, by Treves, Jacobson, Bryant, Bickham, Binnie; Genito-Urinary Surgery, White & Martin, Keyes, Casper-Bonney, Taylor, Henry Morris, Morton; Orthopædic Surgery, Bradford & Lovett, Whitman, Jackson Clarke; Fractures and Dislocations, Stinson, Treatment of, Scudder; Diseases of the Rectum and Anno, Gant, 3rd ed; Surgery of the Chest, Paget, Carl Beck; Minor Surgery, Foote; Operative Surgery, McGrath; Surgical Diagnosis, A. Pearce Gould.

Midwifery:—Obstetrics, Adam Wright, $4.50; Whitridge Williams, $6; Lusk, $5; Hirst, $5; Galabin, $4; Evans, $3; Jellett, $3; Fothergill, $3; Edgar, Obstetrics, $6; Practical Obstetrics, Grandid & Jarman.

Gynæcology:—Galabin, 2.25; Garrigues, $4; Hart and Barbour, $5; Allbutt and Playfair, a System of Gynæcology, $6; Harmann, $5; Kelly, Oper. Gynæcol., 2 vols., $15; Cancer and Uterus, Cullen; Dudley, $5; Penrose, $3.75; C. A. L. Reed; Gilliam, $4; Douglas, Diseases of Abdomen. Practice of Gynæcology, Ashton. Diseases of Women, Webster. Diseases of Women, MacNaughton Jones.

Pathology:—Ziegler, General, I vol., $5; Special, 2 vols., $8; Delafield & Pruden, 7th edition, $5; American Text-book of Pathology, $7.50; Coplin, Manual of Pathology, fourth edition, $3.50; Mallory & Wright, Pathological Technique, 3rd edition, $3; Clinical and Microscopical Diagnosis, F. C. Wood.

Bacteriology:—Muir & Ritchie, $3.75; Abbott, $2.75.

Clinical Methods:—Huchinson & Rainy, Clinical Methods, $2.50; Croftan, Clinical Urinology, $2.50; Simon, Clinical Diagnosis, by Microscopical and Chemical Methods, 5th edition, $4.

Medical Jurisprudence:—Reese, $3; American Text-book of Legal Medicine, Petersen and Haines, $10; Draper, Legal Medicine, $4; Herald, $4; Mann, $4; Luff, $6; Vivian Poore, $4; Taylor, $4.50. References: Whitthaus and Becker, $20; McLane Hamilton, $11; Greene, Life Insurance, $4; The Physician Himself, Cathell (13th ed.).

Anæsthesia:—Hewitt, $4; Probyn-Williams, $1.25; Patton, $2.

Biology:—Parker, $2.60; Huxley, $2.60.

Physics:—Gage's Principles of Physics, $1.30.

Ophthalmology:—Nettleship, $2.25; Swanzy, $3; Juler, $5.50; de Schweinitz, $5; Carter and Frost, $2.25; J. Edward Jackson, $2.50; May, $2; Posey and Wright, Diseases of the Eye, Ear, Nose and Throat, $7; May, Diseases of the Eye, $2; Vesey, Diseases of the Eye, $2; Berry, Manual of Practical Ophthalmology; Theobald, Prevalent Diseases of the Eye; Wood & Woodruff, Common Diseases of the Eye; Modern Ophthalmology, Ball.

Otology:—Prichard's $1.50; Buck, $2; Roosa, $5.25; Bacon's Manual of Otology, $2; Barnhill and Wales.

Laryngology:—Lennox Brown, $8; Bosworth, $4.50; Price Brown, $3.50; Cookley, $2.75; Parker, Diseases of the Throat and Nose, $4.50; Kyle, Diseases of the Nose and Throat, $3; Cookley, Diseases of the Throat and Nose, $2.75; Grayson, Diseases of the Throat, Nose and Ear, $4; Gleason, Diseases of the Throat, Nose and Ear, $2.50; Throat and Ear, Bishop, $4.

5-6 p.m.						

NOTE.—Students of the Fifth Year may be required to do Special Work in any of the Subjects of Study at other hours than those indicated on the Time Table. Students are required to attend and assist in Autopsies at the Toronto General Hospital. The hours for such will be posted from time to time on the Bulletin Board at the University. Clinical laboratory work must be carried on in connection with the cases seen in the clinics.

* These clinics will not be given in the six weeks during which the student is engaged in operations on the Cadaver.

† This course will include surgical Pathology and the Pathology of the central nervous system.

‡ Michaelmas Term.

¶ Easter Term.

THE UNIVERSITY OF TORONTO MEDICAL SOCIETY.

This Society consists of the graduates and undergraduates enrolled in the Faculty of Medicine of the University of Toronto. It is under the patronage of the members of the Medical Faculty and its object is to deal with all matters pertaining to the general interest and welfare of the students, specially:—

(*a*) To encourage interest in general medical science and literature, and in the pursuit of medical studies.

(*b*) To provide a supply of periodicals and magazines for the reading rooms.

(*c*) To be a means of communication between the Student body and the Faculty or others, when such communication is desirable.

UNIVERSITY OF TORONTO MEDICAL STUDENTS' YOUNG MEN'S CHRISTIAN ASSOCIATION.

The meetings are held weekly in the building of the Young Men's Christian Association. The clergy and other prominent residents of the city frequently take part in the proceedings.

The objects of the association are to form a bond of union between medical students whose principles and aim in life are "Christian," and to render whatever practical assistance is possible to all medical students, especially those who are entering upon their medical studies. The Reception Committee of the association will be at the Union Station to meet and welcome all incoming students and to give any information and assistance that may be required. A list of suitable boarding houses will be available for the convenience of those who require it.

REGULATIONS RELATING TO STUDENTS.

1. No student will be registered in any year, or be allowed to continue in attendance, whose presence for any cause is deemed by the Faculty Council or Caput, to be prejudicial to the interests of the University. Registration in any year does not entitle a student to Registration in a subsequent year.

2. Students are required to attend the courses of instruction and the examinations in all subjects prescribed for students of their respective standing, and no student will be permitted to remain in the University who persistently neglects academic work.

3. All interference on the part of any student with the personal liberty of another, by arresting him, or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Council. Any student convicted of participation in such proceedings will render himself liable to expulsion from the University.

4. A student who is under suspension, or who has been expelled from a College or the University, will not be admitted to the University buildings or grounds.

5. The constitution of every University society or association of students and all amendments to any such constitution must be submitted for approval to the Caput. All programmes of such societies or associations must, before publication, receive the sanction of the Caput. Permission to invite any person not a member of the Faculty of the University to preside at or address a meeting of any society or association must be similarly obtained. Societies and associations are required to confine themselves to the objects laid down in their constitution.

6. The name of the University is not to be used in connection with a publication of any kind without the permission of the Caput.

Faculty of Medicine.

MATRICULATION.

General Regulations.

Candidates may enter the Faculty of Arts by passing either the Junior or the Senior Matriculation examination.

Candidates for Junior Matriculation must produce satisfactory certificates of good character and of having completed the sixteenth year of their age.

The subjects of Junior Matriculation are as follows:—Latin, English, History, Mathematics, and any two of the following:—Greek, German, French, Experimental Science. In view of the language requirements in the undergraduate course, candidates are strongly recommended to take two languages for their options.

Pass and honour papers will be set in each of these subjects.

The pass papers are as follows:—Latin Authors, Latin Composition; English Grammar, English Composition, English Literature; History; Arithmetic, Algebra, Plane Geometry; Greek Authors, Greek Composition; German Authors, German Composition; French Authors, French Composition; Experimental Science.

The recommendations of the Principals of approved schools will be accepted in lieu of formal examinations in English Grammar and Arithmetic.

The pass standard is forty per cent. of the marks assigned to a paper, with such modification or exceptions as may be deemed proper in consideration of the total number of marks and the confidential reports of the Principal.

The first class honour standard is seventy-five per cent.; the second class sixty-six per cent., and the third class fifty per cent. of the marks assigned to the subject.

Candidates for honours and scholarships will be examined only on the honour papers in a subject, but candidates who fail to obtain honours may receive pass standing in the subject.

Candidates who have obtained pass standing in at least one-half of the subjects may complete Junior Matriculation by passing in the remaining subjects at a subsequent examination or examinations.

The examination for pass and honour Junior Matriculation is held annually in July at centres in Ontario, and, if application is made to the Senate, the examination may, with the co-operation of the Department of Education, be held at centres outside Ontario.

Applications accompanied by the prescribed fee must be sent not later than the 24th of May, to the local Public School Inspector, or in the case of candidates intending to write at the University, to the Registrar.

Scholarship candidates must also send a special application by the same date to the Registrar according to a form to be obtained from him. The application must be accompanied by the fee when the candidate intends to write at the University; when he proposes to write at some other centre, the ordinary application and the fee must be sent to the local Public School Inspector.

A Junior Matriculation examination will be held in June at such centres outside Ontario as may from time to time be authorized by the Senate. Applications for the establishment of such local centres must be made to the Registrar not later than the 15th of April in each year. Applications from candidates for this examination must be sent to the Registrar not later than the 1st of May.

A Junior Matriculation examination, at which no honour papers are set, will be held in September at the University and at such other centres as may from time to time be authorized by the Senate. Candidates who have failed in a minority of subjects at a previous examination, as well as new candidates, may present themselves at this examination. Applications must be sent to the Registrar not later than the 1st of September.

The presiding examiner's fee of $5.00 per diem, together with any other necessary expenses in connection with a local examination, must be met by the candidates at the centre, or by the authorities of the School or College on whose application it is held.

Candidates who have passed Junior Matriculation may present themselves at a subsequent examination for Junior Matriculation Scholarships. A person to whom a scholarship has been awarded may not compete a second time.

EQUIVALENT EXAMINATIONS.

A person who has passed the matriculation examination of another University may be admitted *ad eundem statum* on such conditions as the Senate, on application, may prescribe.

The local examinations conducted by the University of Oxford and Cambridge are accepted *pro tanto.*

Certificates of having passed the whole, or at least one-half, of the subjects common to the matriculation and other examination of any of the following examinations will be accepted *pro tanto.*

Province of Ontario.

The Junior and Senior Teachers' examinations, or examinations of the same standard under other names.

Candidates who have already passed Part I. of the pass Junior Matriculation, or of the Junior Leaving examination, will not be required to pass again in the subjects thereof.

Province of Quebec.

The Associate in Arts examination.

Province of New Brunswick.

The examinations for Superior and Grammar School Licenses.

Province of Nova Scotia.

The Junior and Senior Leaving examinations (Grades XI. and XII.).

Province of Manitoba.

The Second Class Teachers' examination.

Province of British Columbia.

The Intermediate and Senior Grade examination.

Province of Prince Edward Island.

The First Class Teachers' License examination.

Province of Alberta.

The Standard VII. and VIII. examinations.

Province of Saskatchewan.

The Standard VII. and VIII. examinations.

Newfoundland.

Intermediate and Associate Grade examinations.

Candidates whose certificates do not cover all the subjects may complete matriculation by passing in the remaining subjects as prescribed by the University, or by passing in the subjects of similar standard as prescribed by the Education Department of the Province by which the certificate was issued.

The Senate will consider applications for the recognition of certificates other than those mentioned, as occasion may require.

FEES.

The Fees payable are as follows:—

For Junior Matriculation	$5 00
For supplemental examination in one subject	2 00
For supplemental examination in two subjects	4 00
For supplemental examination, maximum fee	5 00
For registration of certificates for other than university purposes	5 00
For registration of certificates other than those of Ontario, which exempt the applicant from the full Matriculation examination	5 00
For admission *ad eundem statum*	5 00

SCHOLARSHIPS.

Where there is no letter prefixed, the scholarship is open to all competitors and is tenable in any one of the colleges. In all other cases, the letter U. indicates University College; the letter V., Victoria College; and the letter T., Trinity College. The student to whom one of these scholarships is awarded is required to enroll in each year of his course in the College to which the scholarship belongs.

General Proficiency.

(1) The Prince of Wales Scholarship, the gift of His Majesty the King, of the value of $50, and the First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $254.

T. (2) The Upper Canada College-Trinity Scholarship, the gift of Upper Canada College Old Boys, who are alumni of Trinity College, of the value of $100, with free tuition for four years, of a total value of $244.

Pass papers rank at half the value of honour papers. The sum of $60 will be paid in equal terminal instalments in the first year, and $40 in the second year.

U. (3) The Gibson Scholarship, the gift of the Hon. J. M. Gibson, of the value of $100, with free tuition for three years, of a total value of $208.

T. (4) The F. A. Bethune Scholarship, the gift of the trustees of the F. A. Bethune Memorial Fund, of the value of $60, with free tuition for four years, of a total value of $204.

This Scholarship is open to competition to boys who have passed through the Sixth Form of Trinity College School. The conditions are the same as for 2, except that the money will all be paid in the first year in equal terminal instalments.

(5) The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $55, with free tuition for four years, of a total value of $199.

(6) The Third Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $50, with free tuition for four years, of a total value of $194.

(7) The Fourth Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $45, with free tuition for four years, of a total value of $189.

(8) The Fifth Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

(9) The Sixth Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $35, with free tuition for three years, of a total value of $143.

(10) The Seventh Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $30, with free tuition for three years, of a total value of $138.

(11) The West Durham Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $25. This scholarship is preferentially tenable by a scholar from the Bowmanville High School.

Candidates for these scholarships are required to obtain first class honours in at least one department.

Proficiency in Two Departments.

CLASSICS AND MODERN LANGUAGES.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $204.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $55, with free tuition for four years, of a total value of $199.

The Third Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

The Fourth Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $35, with free tuition for three years, of a total value of $143.

CLASSICS AND MATHEMATICS.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $204.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

MODERN LANGUAGES AND MATHEMATICS.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $204.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

MODERN LANGUAGES AND SCIENCE.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $204.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

MATHEMATICS AND SCIENCE.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for four years, of a total value of $204.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $40, with free tuition for three years, of a total value of $148.

ENGLISH, HISTORY AND GEOGRAPHY.

T. The Burnside Scholarship, founded in memory of the late Dr. Burnside, of the value of $40, with free tuition for four years, of a total value of $184.

Candidates for these scholarships must obtain first class honours in one of the specified departments and at least second class in the other.

Proficiency in One Department.

CLASSICS.

V. The Martha Bell Scholarship, the gift of Professor A. J. Bell, of the value of $100, with free tuition for four years, of a total value of $244.

T. The Wellington Scholarship, founded by the first Duke of Wellington, of the value of $80, with free tuition for four years, of a total value of $224.

U. The McCaul Scholarship, the gift of Principal Hutton, Dr. Seath and W. T. White, B.A., of the value of $75, with free tuition for four years, of a total value of $219.

T. The Bishop Strachan Scholarship, founded in memory of the first Bishop of Toronto, of the value of $40, with free tuition for four years, of a total value of $184.

The First Mary Mulock Scholarship, the gift of the late Mrs. Mulock, of the value of $60, with free tuition for three years, of a total value of $168.

U. The First William Dale Scholarship, the gift of William Dale, M.A., of the value of $60, with free tuition for three years, of a total value of $168.

V. The Flavelle Scholarship, the gift of J. W. Flavelle, LL.D., of the value of $60, with free tuition for three years, of a total value of $168.

The Second Mary Mulock Scholarship, the gift of the late Mrs. Mulock, of the value of $60, with free tuition for two years, of a total value of $132.

V. The W. E. H. Massey Scholarship, the gift of the late W. E. H. Massey, Esq., of the value of $50, with free tuition for two years, of a total value of $122.

U. The Second William Dale Scholarship, the gift of William Dale, M.A., of the value of $50, with free tuition for two years, of a total value of $122.

MODERN LANGUAGES.

T. The Dickson Scholarship, the gift of the late William Dickson, Esq., of the value of $40, with free tuition for four years, of a total value of $184.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for three years, of a total value of $168.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $30, with free tuition for three years, of a total value of $138.

MATHEMATICS.

T. The Wellington Scholarship, founded by the first Duke of Wellington, of the value of $80, with free tuition for four years, of a total value of $224.

T. The Burnside Scholarship, founded in memory of the late Dr. Burnside, of the value of $40, with free tuition for four years, of a total value of $184.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for three years, of a total value of $168.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $30, with free tuition for three years, of a total value of $138.

SCIENCE.

T. The Dickson Scholarship, the gift of the late William Dickson, Esq., of the value of $40, with free tuition for four years, of a total value of $184.

The First Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $60, with free tuition for three years, of a total value of $168.

The Second Edward Blake Scholarship, the gift of the Hon. Edward Blake, Ex-Chancellor of the University, of the value of $30, with free tuition for three years, of a total value of $138.

Candidates for these scholarships must obtain first class honours in their departments.

The Leonard McLaughlin Scholarship.

T. This scholarship has been endowed by Mr. and Mrs. Michael McLaughlin, of Toronto, in memory of their only son Leonard, who was at the time of his death, December 10th, 1899, an undergraduate of Trinity College. As he was a pupil at Upper Canada College from 1890 to 1896, only pupils of that School are eligible for the scholarship. The award will be made by a board consisting of the Provost of Trinity College with the Principal and the Classical Master of Upper Canada College to such candidate as, without written examinations, shows evidence of possessing good scholarship in Classics, as well as manliness, a sense of honour, and a strong moral character. Failing a suitable candidate in Classics, the Board may at its discretion select one in Modern Languages, though it is not under any obligation to make a selection in any given year.

Successful candidates must pursue a course of study in Classics or Modern Languages to the satisfaction of the Board. In case of necessity, to be by it determined, the Board may allow a postponement of the time of beginning the course or an interruption of the same.

The scholarship is worth $200; $100 will be paid to successive holders at the end of Michaelmas Term in the First Year, and $100 at the end of the Michaelmas Term in the Second Year.

The Cooper Exhibitions.

T. These two exhibitions, founded by the Rev. C. W. Cooper, of the value of $100 each, are open to any matriculated student of Trinity College not holding a scholarship, with a preference to the sons of clergymen. The exhibitioners are nominated by the Most Reverend the Lord Archbishop of Toronto.

The Mackenzie Bursaries.

T. Mr. William Mackenzie, of Toronto, offers ten Bursaries of $100 each, to be given to resident students in Arts enrolling in Trinity College. A preference will be given to Presbyterians.

Corporation Bursaries.

T. The Corporation has also provided that five Bursaries of a value of $50 per annum be open every year for a period not exceeding three years. Any student who shall have passed the Matriculation examination, and shall have satisfied the Executive Committee that he cannot, without the aid thus afforded, avail himself of the advantage of a University education, will be eligible for a bursary, provided that he is not the holder of a scholarship or exhibition. *Caeteris paribus* the sons of clergymen will be preferred.

Scholarships, exhibitions and bursaries will be forfeited if the holder fails to keep a term, or to pass any examination at the regular time.

REGULATIONS REGARDING THE UNIVERSITY SCHOLARSHIPS.

The marks for all classes of scholarships will be assigned in the following proportions:

CLASSICS	Latin	600	
	Greek	600	
			1200
MATHEMATICS			1200
MODERN LANGUAGES	English	400	
	French	400	
	German	400	
			1200
SCIENCE	Chemistry	400	
	Physics	400	
	Biology (Botany, Zoology)	400	
			1200
HISTORY			200

Candidates for scholarships shall at the same examination pass in all the subjects necessary for Junior Matriculation.

A candidate to whom a scholarship has been awarded at a Junior Matriculation examination may not compete for a scholarship at a subsequent Matriculation examination.

With the exception of the Prince of Wales Scholarship, no one shall be entitled to hold more than one University scholarship; but anyone who, but for this provision, would have been entitled to a second scholarship will be published in the lists.

College Scholarships may be held with University Scholarships.

Every candidate for a Junior Matriculation scholarship shall, on application for examination, sign a declaration to the effect that he intends to proceed to a degree in Arts in this University.

A candidate competing for University scholarships may defer, until the first of August, his declaration as to the College in which he intends to register.

No scholarship will be awarded save on condition that the candidate becomes a matriculated student in actual attendance in this University, through enrolment in one of the colleges.

Free tuition awarded will be available on the following conditions:— For the First Year on the award of the scholarship; for any year after the first on proof that the claimant has passed his examination for the preceding year with a first class in an honour course.

In case in any year any scholarship be not taken, it will be allowable to award such scholarship, or some part thereof, to a candidate who has shown special excellence in the examination in some other group, and has taken scholarship rank therein, but has failed to win a scholarship therein.

These regulations are subject to change by the Senate.

REGULATIONS RESPECTING UNIVERSITY COLLEGE AND VICTORIA COLLEGE SCHOLARSHIPS.

Scholarships in University College and in Victoria College are tenable with an Edward Blake Scholarship, always providing that the winner be in first class honours in Classics at Matriculation and becomes and continues to be a registered student in attendance upon lectures either in Classics or in English and History with the Classical option in the College by which the scholarship is awarded. In the event of no eligible candidate being forthcoming at matriculation for either of these scholarships, the scholarships will be held over until the year following, when two scholarships will be offered.

REGULATIONS RESPECTING TRINITY COLLEGE SCHOLARSHIPS.

The holders of scholarships are ordinarily required to reside in College, but when they reside with their parents or guardians by permission of the Provost, they will be allowed free tuition when such is the whole or part of the emolument of their scholarships. The condition as to residence is absolute in the case of the Upper Canada College-Trinity, the F. A. Bethune and the Leonard McLaughlin Scholarships.

In order to hold their scholarships in the succeeding years, candidates must retain the positions in their departments which they obtained at Junior Matriculation.

JUNIOR MATRICULATION.

FOR PASS.

Greek.

Translation into English of passages from the prescribed texts, with questions thereon.

Translation at sight of simple narrative passages similar to the Xenophon prescribed.

Questions on Greek accidence and on the common rules of Greek syntax, to test the candidate's accuracy and comprehension in such matters as are needful for the intelligent reading of his texts.

The following are the prescribed texts:—

1909, 1911: Xenophon, Philpotts and Jerram, Easy selections from Xenophon, chaps. 3, 4, 5; Homer, Iliad. I., 1-350.

1910: Xenophon, Philpotts and Jerram, Easy selections from Xenophon, chaps. 3, 4, 5; Homer, Iliad. VI., 66-118 and 237 to the end.

Two papers will be set: (1) Prescribed texts; (2) translation at sight, accidence and syntax.

Latin.

Translation at sight of passages of average difficulty from Cæsar, upon which special stress will be laid.

Translation, with questions, from a prescribed portion of Virgil's Æneid.

The marks assigned for the translation from prescribed authors shall not be more than twenty-five per cent. of the total marks assigned to the Latin papers.

Questions on Latin accidence.

Translation into Latin of English sentences involving a knowledge of the following principles of Latin syntax: The common uses of the cases; the accusative with the infinitive; the subjunctive in simple sentences; final and result clauses; the law of the sequence of tenses; the indirect question; verbs of fearing, doubting and hindering; the use of the participle, gerund and gerundive, active and passive periphrastic; indirect discourse; and the common forms of the conditional sentence.

The vocabulary will be taken from the prescribed portion of Cæsar and special stress will be laid upon this part of the examination.

Examination upon a short prescribed portion of Cæsar, to test the candidate's knowledge of Latin syntax and his power of idiomatic translation.

The following are the texts prescribed:—

1909: Cæsar, Bellum Gallicum, Book IV., chaps. 20-38, and Book V., chaps. 1-23; Virgil, Æneid, Book II., vv. 1-505.

1910, 1911: Cæsar, Bellum Gallicum, Book IV., chaps, 20-38, and Book V., chaps. 1-23; Virgil, Æneid, Book I., vv. 1-510.

Two papers will be set: (1) Translation at sight, Virgil, and accidence. (2) Translation into Latin, syntax and idiomatic translation from prescribed Cæsar, etc.

English.

GRAMMAR AND RHETORIC: The main facts in the development of the language. Etymology and syntax, including the logical structure of the sentence and the inflection, classification and elementary analysis of words. The rhetorical structure of the sentence and paragraph.

One examination paper.

COMPOSITION: An essay, to which special importance will be attached, on one of several themes set by the examiner.

One examination paper.

LITERATURE: The candidate will be expected to have memorized some of the finest passages. Besides questions to test the candidate's familiarity with, and comprehension of, the following selections, questions may also be set to determine within reasonable limits his power of appreciating literary art.

The candidate shall produce satisfactory proof, by the certificate of the principal of the school from which he comes or otherwise that he has read carefully, during the preceding year, at least four suitable works in English literature (both prose and poetry) in addition to those prescribed below for examination.

One examination paper.

1909: Coleridge, The Ancient Mariner; Wordsworth, Michael, Influence of Natural Objects, Nutting, Expostulation and Reply, The Tables Turned, The Solitary Reaper, Ode to Duty, Elegiac Stanzas, To the Rev. Dr. Wordsworth, "She was a phantom of delight," To the Cuckoo, The Green Linnet, "Bright flower! whose home," To a Skylark ("Ethereal minstrel! pilgrim of the sky!"), Reverie of Poor Susan, To my Sister, "Three years she grew," September, 1819, Upon the same Occasion, and the following twelve sonnets:—"Two voices are there," "A flock of sheep that leisurely," "Earth hath not anything," "It is not

to be thought of," "Fair star of evening," "O friend, I know not," "Milton, thou shouldst," "When I have borne in memory," "Brook! whose society," "Scorn not the sonnet," "Tax not the royal saint," "They dreamt not of a perishable home;" Shakespeare, Merchant of Venice.

1910: Tennyson, Ode to Memory, The Dying Swan, The Lotus Eaters, Ulysses, "You ask me, why," "Of old sat Freedom," "Love thou thy land," "Tears, idle tears," and the six interlude songs from the Princess, The Brook, Ode on the Duke of Wellington, Charge of the Light Brigade, Enoch Arden; Shakespeare, Julius Cæsar.

1911: Tennyson, The Poet, The Lady of Shalott, Oenone, The Epic and Morte d'Arthur, St. Agnes' Eve, The Voyage, "Break, break, break," In the Valley of the Cauteretz; Browning, My Last Duchess, "How they brought the good news from Ghent to Aix," Love among the Ruins, Home Thoughts from Abroad, Up at a Villa, Andrea del Sarto, The Guardian Angel, Prospice, An Epistle of Karshish, Cavalier Tunes; Shakespeare, Macbeth.

German.

The candidate's knowledge of German will be tested by: (1) simple questions on grammar; (2) the translation of simple passages from English into German; (3) translation at sight of easy passages from modern German, and (4) an examination on the following prescribed texts:—

The texts contained in the High School German Reader.

1909: Baumbach, Waldnovellen.

1910: Hauff, Das kalte Herz.

1911: Leander, Träumereien, pp. 45-90 (selected by Van Daell).

Two papers will be set: (1) Prescribed texts and translation at sight; questions on grammar; (2) the translation of English into German.

French.

The candidate's knowledge of French will be tested by: (1) simple questions on grammar; (2) the translation of simple passages from English into French; (3) translation at sight of easy passages from modern French, and (4) an examination on the following texts:—

Lamennais, Paroles d'un croyant, Chaps. VII. and XVII.; Perrault, le Maître Chat ou le Chat Botté; Dumas, Un nez gelé, and la Pipe de Jean Bart; Alphonse Daudet, la Dernière classe, and la Chèvre de M. Seguin; Legouvé, la Patte de dindon; Pouvillon, Hortibus; Loti, Chagrin d'un vieux forçat; Molière, l'Avare, Acte III. sc. 5 (Est-ce à votre cocher . . . sous la mienne); Victor Hugo, Waterloo, Chap.

IX.; Rouget de L'Isle, la Marseillaise; Arnault, la Feuille; Chateaubriand, l'Exilé; Théophile Gautier, la Chimère; Victor Hugo, Extase; Lamartine, l'Automne; De Musset, Tristesse; Sully Prudhomme, le Vase brisé; La Fontaine, le Chêne et le Roseau.

1909: Labiche, le Voyage de Monsieur Perrichon.

1910: Scribe, le Verre d'eau.

1911: Labiche, la Grammaire.

Two papers will be set: (1) Prescribed texts and translation at sight; questions on grammar; (2) the translation of English into French.

History.

Great Britain and Canada from 1763 to 1885, with the outlines of the preceding periods of British and Canadian history.

The geography relating to the history prescribed.

One half examination paper.

General outlines of Greek history to the fall of Corinth.

General outlines of Roman history to the death of Augustus.

The geography relating to the history prescribed.

One half examination paper.

Mathematics.

ARITHMETIC.—Elementary Rules, Fractions (Vulgar and Decimal), Contracted Methods of Computation, Square Root, Interest, Discount, Commission, Insurance, Stocks and Exchange.

MENSURATION.—The Rectangle, the Parallelogram, the Triangle, the Circle, the Parallelopiped, the Prism, and the Cylinder.

One examination paper.

NOTE.—The problems proposed at this Examination shall be simple and direct, and in their solution neatness and accuracy will be insisted on.

ALGEBRA.—Elementary Rules; highest common measure; lowest common multiple; fractions; square root; simple equations of one, two and three unknown quantities; indices; surds, quadratics of one and two unknown quantities.

One examination paper.

GEOMETRY.—A.—CONSTRUCTIONS.

To construct a triangle with sides of given lengths.

To construct an angle equal to a given rectilineal angle.

To bisect a given angle.

To bisect a given straight line.

To draw a line perpendicular to a given line from a given point in it.

To draw a line perpendicular to a given line from a given point not in the line.

Locus of a point equidistant from two given lines.

Locus of a point equidistant from two given points.

To draw a line parallel to another, through a given point.

To divide a given line into any number of equal parts.

To describe a parallelogram equal to a given triangle, and having an angle equal to a given angle.

To describe a parallelogram equal to a given rectilineal figure, and having an angle equal to a given angle.

On a given straight line to describe a parallelogram equal to a given triangle, and having an angle equal to a given angle.

To find the centre of a given circle.

From a given point to draw a tangent to a given circle.

On a given straight line to construct a segment of a circle containing an angle equal to a given angle.

From a given circle to cut off a segment containing an angle equal to a given angle.

In a circle to inscribe a triangle equiangular to a given triangle.

To find locus of centres of circles touching two given lines.

To inscribe a circle in a given triangle.

To describe a circle touching three given straight lines.

To describe a circle about a given triangle.

About a given circle to describe a triangle equiangular to a given triangle.

To divide a given line similarly to another given divided line.

To find the fourth proportional to three given lines.

To describe a polygon similar to a given polygon, and with the corresponding sides in a given ratio.

To find the mean proportional between two given straight lines.

To construct a polygon similar to a given polygon, and such that their areas are in a given ratio.

To describe a polygon of a given shape and size.

B.—Theorems.

The sum of the angles of any triangle is equal to two right angles.

The angles at the base of an isosceles triangle are equal, with converse.

If the three sides of one triangle be equal, respectively, to the three sides of another, the triangles are equal in all respects.

If two sides and the included angle of one triangle be equal to two sides and the included angle of another triangle, the triangles are equal in all respects.

If two angles and one side of a triangle be equal to two angles and the corresponding side of another, the triangles are equal in all respects.

If two sides and an angle opposite one of these sides be equal, respectively, in two triangles, the angles opposite the other pair of equal sides are either equal or supplemental.

The sum of the exterior angles of a polygon is four right angles.

The greater side of any triangle has the greater angle opposite it.

The greater angle of any triangle has the greater side opposite it.

If two sides of one triangle be equal respectively to two sides of another, that with the greater contained angle has the greater base, with converse.

If a transversal fall on two parallel lines, relations between angles formed, with converse.

Lines which join equal and parallel lines towards the same parts are themselves equal and parallel.

The opposite sides and angles of a parallelogram are equal and the diagonal bisects it.

Parallelograms on the same base, or on equal bases, and between the same parallels are equal.

Triangles on the same base, or on equal bases, and between the same parallels are equal.

Triangles equal in area, and on the same base, are between the same parallels.

If a parallelogram and a triangle be on the same base, and between the same parallels, the parallelogram is double the triangle.

Expressions for area of a parallelogram, and area of a triangle.

The complements of parallelograms about the diagonal of any parallelogram are equal.

The square on the hypotenuse of a right-angled triangle is equal to the sum of the squares on the sides.

If a straight line be divided into any two parts, the sum of the squares on the parts, together with twice the rectangle contained by the parts, is equal to the square on the whole line.

The square on a side of any triangle is equal to the sum of the squares on the two other sides + twice the rectangle contained by either of these sides and the projection of the other side on it.

If more than two equal straight lines can be drawn from the circumference of a circle to a point within it, that point is the centre.

The diameter is the greatest chord in a circle, and a chord nearer the centre is greater than one more remote. Also the greater chord is nearer the centre than the less.

The angle at the centre of a circle is double the angle at the circumference on the same arc.

The angles in the same segment of a circle are equal, with converse.

The opposite angles of a quadrilateral inscribed in a circle are together equal to two right angles, with converse.

The angle in a semicircle is a right angle; in a segment greater than a semicircle less than a right angle; in a segment less than a semicircle greater than a right angle.

A tangent is perpendicular to the radius to the point of contact; only one tangent can be drawn at a given point; the perpendicular to the tangent at the point of contact passes through the centre; the perpendicular from centre on tangent passes through the point of contact.

If two circles touch, the line joining the centres passes through the point of contact.

The angles which a chord drawn from the point of contact makes with the tangent, are equal to the angles in the alternate segments.

The rectangles under the segments of intersecting chords are equal.

If $OA.OB=OC^2$, OC is a tangent to the circle through A, B and C.

Triangles of the same altitude are as their bases.

A line parallel to the base of a triangle divides the sides proportionally, with converse.

If a vertical angle of a triangle be bisected, the bisector divides the base into segments that are as the sides, with converse.

The analogous proposition when the exterior angle at the vertex is bisected, with converse.

If two triangles are equiangular, the sides are proportional.

If the sides of two triangles are proportional, the triangles are equiangular.

If the sides of two triangles about equal angles are proportional, the triangles are equiangular.

If two triangles have an angle in each equal, and the sides about two other angles proportional, the remaining angles are equal or supplemental.

Similar triangles are as the squares on corresponding sides.

The perpendicular from the right angle of a right-angled triangle on the hypotenuse divides the triangle into two which are similar to the original triangle.

In equal circles angles, whether at the centres or circumferences, are proportional to the arcs on which they stand.

The areas of two similar polygons are as the squares on corresponding sides.

If three lines be proportional, the first is to the third as the figure on the first to a similar figure on the second.

Questions and easy deductions on the preceding constructions and theorems.

It is recommended that the study of formal demonstrative Geometry be preceded by a course in Practical Geometry, extending over not more than a year, and embracing the following:—

Definitions; fundamental geometric conceptions and principles; use of simple instruments, as compasses, protractor, graduated rule, etc.; measurement of lines and angles, and construction of lines and angles of given numerical magnitude; accurate construction of figures; some leading propositions in plane geometry reached by induction as a result of accurate construction of figures; deduction also employed as principles are reached and assured. At the examination, questions may be given in Practical Geometry, the constructions being such as naturally spring from the prescribed course. Candidates must provide themselves with a graduated ruler, compasses, set-square and protractor.

In the formal deductive Geometry modifications of Euclid's treatment of the subject will be allowed, though not required, as follows:—

The employment of the "hypothetical construction."

The free employment of the method of superposition, including the rotation of figures about an axis, or about a point in a plane.

A modification of Euclid's parallel postulate.

A treatment of ratio and proportion restricted to the case in which the compared magnitudes are commensurable.

One examination paper.

Elementary Experimental Science.

PHYSICS: Use of meter rule; use of calipers and vernier for more accurate metric measurements (*e.g.*, diameters of wires, thickness of glass, plates, etc.); numerical calculations in the metric system.

Use of balance.

Specific gravity, by special gravity bottle and hydrostatic balance of liquids and of solids.

Boyle's law; barometer; diffusion of gases.

Use of Fahrenheit and centigrade thermometers; determination of zero and boiling point; boiling point dependent on pressure.

Expansion of solids, liquids and gases; examples.

Specific heat, latent heat; easy numerical examples.

Transmutation of matter; indestructibility of matter.

Solution, precipitation, crystallization and evaporation.

One half examination paper.

CHEMISTRY: Properties of hydrogen, chlorine, oxygen, sulphur, nitrogen, carbon, and their different compounds, especially those of economic and industrial importance.

Mixtures, solutions, chemical compounds, elements, nomenclature, laws of chemical combination, reacting weights, chemical formulæ and equations, with easy numerical examples.

One half examination paper.

FOR HONOURS.

Greek.

Translation into English of passages from the prescribed texts, with questions thereon.

Translation at sight of prose passages of average difficulty from Xenophon's historical works.

Translation into Greek of sentences (based upon Xenophon's vocabulary) to test the candidate's scholarship in matters of accidence, syntax and phraseology.

The following are the prescribed texts:—

1909-11: Xenophon, Hellenica (Philpotts' Selections, sections I. and II.); Homer, Iliad I., 1-350; III., 121-244; VI., 66-118, and 237 to the end; Odyssey VI. and IX.

Two papers will be set: (1) prescribed texts; (2) translation at sight and Greek prose composition.

Latin.

Translation into English of passages from prescribed texts.

Translation at sight of passages of average difficulty from Cæsar.

Grammatical questions on the passages from prescribed texts and such other questions as arise naturally from the context.

Translation into Latin of English sentences to illustrate Latin syntax and continuous passages of English, based on Cæsar.

The following are the prescribed texts:—

Cæsar, De Bello Gallico, Books I. and II.; Horace, Odes, Book, I., 1, 2, 5, 6, 10, 14, 22, 24, 31, 34, 35, 38; Book II., 3, 10, 14, 15, 16, 18; Book III., 1, 2, 3, 4, 5, 13, 21, 23, 24, 25, 29, 30; Book IV., 2, 4, 5, 7, 15.

1909: Virgil, Æneid, Book II., vv. 1-505; Cicero, Pro Lege Manilia.

1910, 1911: Virgil, Æneid, Book I., vv., 1-510; Cicero, In Catilinam, I. and III.

Two examination papers: (1) Latin prose; (2) authors and sight translation.

English.

COMPOSITION: An essay on one of several themes set by the examiners. In order to pass in this subject, legible writing, correct spelling and punctuation, and proper construction of sentences are indispensable. The candidate should also give attention to the structure of the whole essay, the effective ordering of the thought, and the accurate employment of a good English vocabulary. About two pages of foolscap is suggested as the proper length for the essay; but quality, not quantity, will be mainly regarded.

One examination paper.

LITERATURE: Such questions only will be set as may serve to test the candidate's familiarity, with, and intelligent and appreciative comprehension of, the prescribed texts. The candidate will be expected to have memorized some of the finest passages. In addition to the questions on the prescribed selections others will be set on a "sight passage" to test the candidate's ability to interpret literature for himself.

The candidate shall produce satisfactory proof by the certificate of the principal of the school from which he comes or otherwise that he has read carefully, during the preceding year, at least four suitable works in English literature (both prose and poetry) in addition to those prescribed below for examination.

One examination paper.

1909: Coleridge, The Ancient Mariner; Wordsworth, Michael, Influence of Natural Objects, Nutting, Expostulation and Reply, The Tables Turned, The Solitary Reaper, Ode to Duty, Elegiac Stanzas, To the Rev. Dr. Wordsworth, "She was a phantom of delight," To the Cuckoo, The Green Linnet, "Bright flower! whose home," To a Skylark, ("Ethereal minstrel! pilgrim of the sky!"), Reverie of Poor Susan, To my Sister, "Three years she grew in sun and shade," September, 1819, Upon the same Occasion. The following twelve sonnets: "Two voices are there," "Scorn not the sonnet," "A flock of sheep that leisurely," "Earth hath not anything," "It is not to be thought of," "Fair star of evening," "O friend! I know not," "Milton! thou shouldst," "When I have borne in memory," "Brook! whose society," "Tax not the royal saint," "They dreamt not of a perishable home;" Shakespeare, Merchant of Venice, Henry IV., Part I.

1910: Tennyson, Ode to Memory, The Dying Swan, The Lotus Eaters, Ulysses, "You ask me, why," "Of old sat Freedom," "Love thou thy land," "Tears, idle tears," and the six interlude songs from The Princess, The Brook, Ode on the Duke of Wellington, Charge of the Light Brigade, Enoch Arden; Shakespeare, Julius Cæsar, Midsummer Night's Dream.

1911: Tennyson, The Poet, The Lady of Shalott, Oenone, The Epic and Morte d'Arthur, St. Agnes' Eve, The Voyage, "Break, break, break," In the Valley of the Cauteretz; Browning, My Last Duchess, "How they brought the good news from Ghent to Aix," Love among the Ruins, Home Thoughts from Abroad, Up at a Villa, Andre del Sarto, The Guardian Angel, Prospice, An Epistle of Karshish, Cavalier Tunes; Shakespeare, Macbeth, As You Like It.

German.

The prescription of work in grammar, the translation of English into German and sight translation is the same for honours as for pass, but the examination will be of a more advanced character.

The following are the prescribed texts:—

The texts contained in the High School German Reader.

1909: Baumbach, Waldnovellen; Zschokke, Der tote Gast.

1910: Hauff, Das kalte Herz; Baumbach, Der Schwiegersohn; Elz, Er ist nicht eifersüchtig; Wichert, Post Festum.

1911: Leander, Träumereien, pp. 45 to 90 (selected by Van Daell).

Baumbach, Der Schwiegersohn; Elz, Er ist nicht eifersüchtig; Wichert, Post Festum.

French.

The prescription of work in grammar, the translation of English into French and sight translation, is the same for honours as for pass, but the examination will be of a more advanced character.

The following are the prescribed texts:—

Lamennais, Paroles d'un croyant, Chaps. VII. and XVII.; Perrault, le Maître Chat ou le Chat botté; Dumas, Un nez gelé, and la Pipe de Jean Bart; Alphonse Daudet, la dernière Classe, and la Chèvre de M. Seguin; Legouvé, la Patte de dindon; Pouvillon, Hortibus; Loti, Chagrin d'un vieux forçat; Molière, l'Avare, Acte III., sc. 5 (Est-ce à votre cocher . . . sous la mienne); Victor Hugo, Waterloo, Chap. IX.; Rouget de l'Isle, la Marseillaise; Arnault, la Feuille; Chateaubriand, l'Exilé; Théophile Gautier, la Chimère; Victor Hugo, Extase; Lamartine, l'Automne; De Musset, Tristesse; Sully Prudhomme, le Vase brisé; La Fontaine, le Chêne et le Roseau.

1909: Labiche, le Voyage de Monsieur Perrichon; Mérimée, Quatre Contes, ed. by F. C. L. Steenderen (Holt & Co.).

1910: Scribe, le Verre d'eau; Malot, Remi en Angleterre, (ed. Margaret de G. Verral. Pitt. Press).

1911: Labiche, la Grammaire; Chateaubriand, Mémoires d'outre-Tombe (selections pub. by Clarendon Press).

History.

General outline of mediæval and modern European history, with special reference to British history.

The geography relating to the history prescribed.

One examination paper.

Mathematics.

ALGEBRA: Elementary rules; highest common measure; lowest common multiple; fractions; square root; simple equations of one, two and three unknown quantities; indices, surds, quadratics of one and two unknown quantities; theory of divisors; ratio, proportion and variation; progressions; notation; permutations and combinations; binomial theorem; interest forms; annuities.

One examination paper.

TRIGONOMETRY: Trigonometrical ratios with their relations to each other; sines, etc., of the sum and difference of angles with deduced formulas; use of logarithms; solution of triangles; expressions for the area of triangles; radii of circumscribed, inscribed and escribed circles. One examination paper.

PROBLEMS: One paper.

GEOMETRY: A.—Exercises on the course prescribed for the pass examination, with special reference to the following topics:—loci; maxima and minima; the system of inscribed, escribed and circumscribed circles of a triangle, with metrical relations; radical axis.

B.—The following additional propositions in Synthetic Geometry, with exercises thereon:—

To divide a given straight line internally and externally in medial section.

To describe a square that shall be equal to a given rectilineal figure.

To describe an isosceles triangle having each of the angles at the base double of the third angle.

To inscribe a regular pentagon in a given circle.

The squares on two sides of a triangle are together equal to twice the square on half the third side and twice the square on the median to that side.

If A B C be a triangle, and A be joined to a point P of the base such that B P : P C = m : n, then $n \cdot A B^2 + m \cdot A C^2 = (m + n) \cdot A P^2 + n \cdot B P^2 + m \cdot P C^2$.

In a right-angled triangle the rectilineal figure described on the hypotenuse is equal to the sum of the similar and similarly described figures on the two other sides.

If the vertical angle of a triangle be bisected by a straight line which also cuts the base, the rectangle contained by the sides of the triangle is equal to the rectangle contained by the segments of the base, together with the square on the straight line which bisects the angle.

If from the vertical angle of a triangle a straight line be drawn perpendicular to the base, the rectangle contained by the sides of the triangle is equal to the rectangle contained by the perpendicular and the diameter of the circle described about the triangle.

The rectangle contained by the diagonals of a quadrilateral inscribed in a circle is equal to the sum of the two rectangles contained by its opposite sides.

Two similar polygons may be so placed that the lines adjoining corresponding points are concurrent.

If a straight line meet the sides B C, C A, A B, of a triangle A B C in D, E, F, respectively, then B D, C E, A F = D C, E A, F B, and conversely. (Menelaus' Theorem.)

If straight lines through the angular points A, B, C of a triangle are concurrent, and intersect the opposite sides in D, E, F, respectively, then B D, C E, A F = D C, E A, F B and conversely. (Ceva's Theorem.)

If a point A lie on the polar of a point B with respect to a circle, then B lies on polar of A.

Any straight line which passes through a fixed point is cut harmonically by the point, any circle, and the polar of the point with respect to the circle.

In a complete quadrilateral each diagonal is divided harmonically by the two other diagonals, and the angular points through which it passes.

C.—ELEMENTARY ANALYTICAL GEOMETRY: Axes of co-ordinates. Position of a point in plane of reference.

Transformation of co-ordinates,—origin changed, or axes (rectangular) turned through a given angle.

$\pm 2A = x_1(y_2 - y_3) + \ldots + \ldots$

Co-ordinates of point dividing line joining $P_1(x_1, y_1)$ and $P_2(x_2, y_2)$ in ratio $m : n$ are

$$x = \frac{m x_2 + n x_1}{m + n}, \quad y = \frac{m y_2 + n y_1}{m + n}.$$

$(P_1 P_2)^2 = (x_1 - x_2)^2 + (y_1 - y_2)^2$

Equations of straight lines.

$$\left.\begin{aligned} \frac{x - x_1}{x_1 - x_2} &= \frac{y - y_1}{y_1 - y_2} \\ \frac{x}{a} + \frac{y}{b} &= 1. \end{aligned}\right\} \text{ Line defined by two points through which it passes.}$$

$$\left.\begin{aligned} \frac{x - a}{\cos\theta} &= \frac{y - b}{\sin\theta} = r. \\ y &= mx + b. \\ y &= m(x - a). \\ x\cos\alpha + y\sin\alpha &= p. \end{aligned}\right\} \text{ Line defined by one point through which it passes, and by its direction.}$$

General equation of 1st degree, $Ax + By + C = 0$, represents a straight line.

Any line through (x_1, y_1) is

$$A(x - x_1) + B(y - y_1) = 0.$$

If θ be angle between $Ax + By + C = 0$ and $A'x + B'y + C' = 0$, then

$$\tan\theta = \frac{A'B - AB'}{AA' + BB'}$$

Condition of $\perp$ rity, $AA' + BB' = 0$.

Condition of $\parallel$ ism, $\frac{A}{A'} = \frac{B}{B'}$.

Distance from (a, b) to $Ax + By + C = 0$, in direction whose direction cosines are (l, m) is

$$-\frac{Aa + Bb + C}{Al + Bm}.$$

$\perp$ distance from (a, b) on $Ax + By + C = 0$.

$$= \pm\frac{Aa + Bb + C}{\sqrt{A^2 + B^2}}.$$

THE CIRCLE—

Equations in forms:

$$x^2 + y^2 = r^2.$$

$$(x - a)^2 + (y - b)^2 = r^2.$$

$$x^2 + y^2 - 2rx = 0.$$

General equation $x^2 + y^2 + 2Ax + 2By + C = 0$,

or $(x + A)^2 + (y + B)^2 = A^2 + B^2 - C$,

represents a circle with centre $(-A, -B)$ and radius

$$\sqrt{A^2 + B^2 - C}.$$

Tangent at (x', y') to $x^2 + y^2 = r^2$, is $xx' + yy' = r^2$.

Normal is $\frac{x}{x'} = \frac{y}{y'}$.

Tangent in form

$$y = mx \pm r\sqrt{1 + m^2}.$$

Pole being (x', y'), polar is $xx' + yy' = r^2$.

If pole move along a line, polar turns about pole of that line.

Square of tangent from

(x', y') to $x^2 + y^2 + 2Ax + 2By + C = 0$

is $x'^2 + y'^2 + 2Ax' + 2By' + C$.

Radical axis of

$$x^2 + y^2 + 2Ax + 2By + C = 0,$$

$$x^2 + y^2 + 2A'x + 2B'y + C' = 0.$$

Easy exercises on the preceding propositions.

One examination paper.

Physics.

MECHANICS: Measurement of velocity; uniformly accelerated rectilineal motion; metre; units of force, work, energy and power; equilibrium of forces acting at a point; triangle, parallelogram, and polygon of forces; parallel forces; principle of moments; centre of gravity; laws of friction; numerical examples.

HYDROSTATICS: Fluid pressure at a point; pressure on a horizontal plane; pressure on an inclined plane; resultant vertical pressure, and resultant horizontal pressure, when fluid is under air pressure and when not; transmission of pressure; Bramah's press; equilibrium of liquids of unequal density in a bent tube; the barometer; air-pump; water-pump, common and force; siphon.

ELECTRICITY: Voltaic cells, common kinds; chemical action in the cell; magnetic effects of the current; chemical effects of the current;

voltameters; electroplating; astatic and tangent galvanometers; simple notions or potential; Ohm's law; shunts; measurement of resistance; electric light, arc and incandescent; current induction; induction coil; dynamo and motor; the joule and watt; electric bell; telegraph; telephone; elements of terrestrial magnetism.

One examination paper.

Chemistry.

Reactions, rates of reactions, reversible reactions, chemical equilibrium. The practical study of the following elements with their most characteristic compounds, having regard to Mendelejeff's classification of the elements, and some of the most important economics and industrial applications: hydrogen, sodium, potassium, magnesium, zinc, calcium, strontium, barium, boron, aluminium, carbon, silicon, tin, lead, nitrogen, phosphorus, arsenic, antimony, bismuth, oxygen, sulphur, fluorine, chlorine, bromine, iodine, manganese, iron, copper, nickel. A report must be furnished showing the amount and nature of the laboratory work done by each candidate, and the teacher's opinion of his proficiency.

One examination paper.

Biology.

1. ELEMENTS OF ZOOLOGY: The candidate will be examined practically on his acquaintance with the structure of the various types prescribed below, and must be prepared to sketch the specimens submitted to him.

Vertebrate Types: 1. The fish:—Any one of the common fresh water fishes of Ontario may be employed for the purpose; special attention should be given to the organs of locomotion, circulation, respiration. As several species are easily obtainable this class may be employed for studying the principles of zoological nomenclature.

2. The frog:—Comparison with the fish as to the organs above mentioned—observation of the development of the spawn of one or more Amphibia.

3. The reptile:—A study of the external form of a turtle and a snake, and comparison of both with a lizard.

4. The bird:—Special attention should be given to the plumage, the bill and feet, and to the modifications of the skeletal, muscular and respiratory systems in connection with aerial life.

5. The mammal:—Characters of the chief domesticated and wild mammals of Ontario must be studied, as well as the main facts of internal structure of one of the smaller forms (*e.g.*, the rabbit). Comparison of the teeth and feet of the pig, horse, sheep, rabbit, dog, mole, bat.

Invertebrate Types: 1. Study of the Crayfish as a type of the arthropods. Comparison of the external form of the crayfish with an

insect (*e.g*, grasshopper, cricket, or cockroach) also with a millipede and a spider.

2. Unsegmented and segmented worms (Planaria or Pistome and earthworm or leech.

3. Fresh-water mussel and snail.

4. A fresh-water unicellular animal such as an Amoeba or Paramecium.

The natural habits of the various animals studied.

Elements of zoological classification based on forms studied.

2. ELEMENTS OF BOTANY: The examination will test whether the candidate has practically studied representatives of the flowering plants of the locality in which the preparatory school is situated.

It will further require an elementary knowledge of the following topics:—

Comparison of the various organs of flowering plants:—roots, stems, leaves, hairs and parts of the flower. Reproduction, pollination, fertilization and the nature of fruits and seeds.

Structure of representatives of the chief sub-divisions of cryptogams such as a fern, a lycopod, a horsetail, a liverwort, a lichen, a moss, a mushroom and a chara.

Microscopic structure of plants.

Principles of classification.

Vegetable physiology, especially of nutrition, growth and movement. Relation to environment.

REGULATIONS RELATING TO DEGREES IN MEDICINE.

The Degrees in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.).

BACHELOR OF MEDICINE.

Candidates for the degree of Bachelor of Medicine are required to matriculate and to attend during five sessions of at least eight months each the courses of instruction presented, and to pass five examinations taken in the following order: the First at the end of the first session; the Second at the end of the second session; the Third at the end of the third session; the Fourth at the end of the fourth session; and the Fifth at the end of the fifth session.

Students who began their course prior to 1908, are required to spend four years only in professional study in the Faculty of Medicine before being permitted to proceed to a degree in medicine.

Courses of instruction and examination of the first year under the four year curriculum cease in September, 1908, these of the second, third and fourth year of the same course will cease in 1909, 1910, 1911, respectively, and will not be revived for the benefit of these who fail to secure standing under the four year curriculum or who have not taken the course continuously. All such students are required to proceed under the five year curriculum.

ENTRANCE.

Candidates for the degree must pass the Matriculation examination, unless (1) they possess a degree in Arts not being an Honorary Degree, from any Dominion or British University; or (2) have already matriculated in the Faculty of Arts or in the Faculty of Law in this University; or (3) have been registered as Matriculates in the College of Physicians and Surgeons of Ontario.

Students who have not completed matriculation will not be admitted to enter the course of instruction of the Second Year.

No fee will be charged for transferring from the Faculty of Arts to that of Medicine.

REGISTRATION.

Students entering the University are required to submit the certificates on which they claim standing to the Registrar before being permitted formal registration with the Secretary of the Faculty.

Candidates who at the close of the Supplemental examinations have failed to secure standing will not be eligible for registration in the next higher year.

All students who enter upon the study of medicine on and after October 1st, 1908, shall be required to adhere to the following regulation regarding their standing through the course:

"A student who has attended the course of instruction in any "year will be required to complete the examination for that year "before he will be permitted to register in the succeeding year."

ATTENDANCE.

Candidates are required to attend lectures and receive practical instruction during each of four years at this University.

The Senate may accept certificates of attendance at the lectures and practical instruction in the laboratories of affiliated and other recognized institutions. A student who fails to do satisfactory term work in any subject is not permitted to present himself for examination in that subject, either theoretical or practical, until he is able to present satisfactory certificates of term work completed.

EXAMINATIONS.

The annual examinations are styled the First, Second, Third, Fourth and Fifth examinations, and are to be passed at the end of the First, Second, Third, Fourth and Fifth academic years respectively.

The annual examinations are held in May, and the supplemental examinations in September. Candidates who fail in the first professional examination in May are now able to take advantage of a special qualifying course in Physics, Chemistry and Biology which is now provided by the University during the summer months and may thus qualify for the September examination. For more definite information see the summer session announcement.

Candidates at any examination who have passed in the majority of the subjects required may present themselves at the supplemental examinations next ensuing, in the subjects in which they failed, and on passing at such examinations, shall be allowed their year.

Undergraduates below the standing of the Fifth Year, who have been rejected or who have been prevented from attending the annual examinations, by sickness, domestic affliction, or other causes beyond their control, may present themselves for examination at the Supplemental examinations in September.

Candidates who failed to attend at the annual examinations must prove to the satisfaction of the President before presenting themselves in September, the existence and sufficiency of the alleged cause of absence.

Undergraduates of the Fifth Year who have failed in not more than three subjects may present themselves for examination in the said subjects at the Supplemental examinations in September.

Graduates of this University in the Honour Department of Biological and Physical Sciences may enter at the beginning of the Third Year and may postpone the examination in Materia Medica and Elementary Therapeutics until the Third examination.

In the case of Graduates or Undergraduates in Natural Sciences or Biology, certificates of attendance on the second course of Practical Anatomy and on the second course of fifty lectures on Anatomy, may be presented with the certificates of attendance on the lectures of the Third Year.

Every undergraduate who proposes to present himself at an examination must send to the Secretary a statement (according to a printed form which will be furnished) of the course he is taking, whether he intends to compete for Honours, and such other particulars as the printed form may indicate, together with the original certificates referred to in this statement.

The work in the laboratories and in the wards of the hospitals during the session is an essential part of the instruction and will be considered in determining standing at any examination.

Before admission to examination the candidate is required to submit evidence of having complied with the regulations respecting attendance upon laboratory and clinical work in each of the subjects of instruction for the year in which he seeks examination. A certificate is issued by the University, and must be signed by the head or heads of each department of instruction.

The following Honour courses of instruction and examinations in the Faculty of Arts are accepted in the place of courses of instruction and examinations in the Faculty of Medicine, according to the subjoined scheme:—

Faculty of Arts.		Faculty of Medicine.
1. First Year Biology.	equivalent to	First Year Biology.
2. First Year Physics.	equivalent to	First Year Physics (with the exception of the Sound, Light and Electricity of this course).
3. First and Second Year Chemistry of the Honour course in Biology.	equivalent to	First Year Chemistry.
4. Physiology and Physiological Chemistry of the Third and Fourth Years of the Honour courses in Biology and Biological and Physical Sciences.	equivalent to	Second Year Physiology and Physiological Chemistry.

5. Cytology and Histology of Third Year of Honour course in Biology and Biological and Physical Sciences.	equivalent to	Histology of Second Year.
6. Embryology of Fourth Year in Biology and Biological and Physical Sciences.	equivalent to	Embryology of Second Year.
7. Anatomy of Third and Fourth Years of the Honour course in Biological and Physical Sciences.	equivalent to	Anatomy of First and Second Years.

EQUIVALENT EXAMINATIONS.

Courses of lectures and examinations in the Faculty of Arts are accepted in the place of courses of lectures and examinations in the Faculty of Medicine, according to the following scheme:—

Faculty of Arts.		Faculty of Medicine.
1. Honour course and examination in Second Year Biology.	equivalent to	course and examination in First Year Biology.
2. Honour course and examination in Second Year Chemistry, and Physics of the Honour course in Natural Sciences or Biological and Physical Sciences.	equivalent to	course and examination in First Year Inorganic Chemistry and Physics.
3. Honour course and examination in Third Year Chemistry.	equivalent to	course and examination in Second Year Chemistry (with the exception of Chemistry applied to Physiology).
4. Honour course and examination in Fourth Year Biology.	equivalent to	course and examination in Second Year Physiology and Embryology and Histology.

4. Attendance at the Honour course and examination in the Fourth Year Physiological Chemistry, in the Faculty of Arts, is equivalent to attendance at the course and examination in Chemistry applied to Physiology of the Second Year in the Faculty of Medicine.

Candidates who desire to compete for scholarships and medals are required to submit to the annual examination in all the subjects of each examination, though otherwise entitled to partial exemption according to the preceding scheme; and candidates not competing for scholarships or medals, who are entitled to exemption according to the preceding scheme, will rank in Honours in these subjects.

COURSES OF INSTRUCTION.

A full course extends over a period of eight months.
(FIVE YEAR COURSE.)

First Year.

COURSES OF EIGHT MONTHS EACH—

1. Osteology.
2. Biology.
3. Chemistry.
4. Practical Chemistry.
5. Physics.
6. Practical Physics.

COURSES OF FOUR MONTHS EACH—

1. Practical Osteology.
2. Practical Biology.
3. Mammalian Anatomy.
4. Histology.

(FOUR YEAR COURSE.)

Second Year.

COURSES OF EIGHT MONTHS EACH—

1. Anatomy.
2. Practical Anatomy.
3. Physiology.
4. Practical Physiology.
5. Embryology and Histology.
6. Methods of Physical Examination.

COURSES OF FOUR MONTHS EACH—

1. Organic Chemistry.
2. Practical Chemistry.
3. Practical Physiological Chemistry.
4. Pharmacy.
5. Pharmacology.

Third Year.

COURSES OF EIGHT MONTHS EACH—

1. Medicine.
2. Clinical Medicine.
3. Surgery.
4. Clinical Surgery.
5. Pathology.
6. Practical Pathology.
7. Obstetrics.
8. Attendance in the wards of a general hospital having not less than 100 beds.

COURSES OF FOUR MONTHS EACH—

1. Therapeutics.
2. Jurisprudence and Toxicology.
3. Topographical Anatomy.

A COURSE OF TWO MONTHS—

Clinical instruction in contagious diseases and vaccination.

Fourth Year.

COURSES OF EIGHT MONTHS EACH—

1. Medicine.
2. Clinical Medicine.
3. Surgery.
4. Clinical Surgery.
5. Pathology.
6. Practical Pathology.
7. Obstetrics.
8. Ophthalmology (examination of the eye, commoner diseases); Otology (examination of the ear, commoner diseases); Rhinology and Laryngology (commoner diseases of the nose and throat).
9. Attendance in the wards of a general hospital having not less than 100 beds.

COURSES OF FOUR MONTHS EACH—

1. Gynæcology.
2. Hygiene and Preventive Medicine.

COURSE OF TWO MONTHS.

Mental Diseases.

At the Fourth examination, the candidate is required to submit the following certificates:—

1. Of having conducted at least six labours.
2. Of proficiency in vaccination.

Of having attended twelve autopsies.

The certificate of a registered practitioner will be accepted in respect of 1 and 2.

Fifth Year.

COURSES OF SIX MONTHS EACH—

1. Medicine.
2. Clinical Medicine.
3. Surgery.
4. Clinical Surgery.
5. Pathology (gross and microscopical).
6. Clinical Gynæcology and Operative Obstetrics.
7. Ophthalmology, Otology, Laryngology and Rhinology.

COURSES OF THREE MONTHS EACH—

1. Special Therapeutics.
2. Regional Anatomy.
3. Advanced Physiology of the digestive and nervous systems.

A COURSE OF AT LEAST TWO MONTHS—

Anæsthetics.

COURSES OF AT LEAST SIX WEEKS—

1. History of Medicine.
2. Life Assurance.

The lectures in the Fifth Year are not to exceed two per diem, the remaining part of the day is to be devoted to laboratory and hospital work.

SUBJECTS OF THE DIFFERENT EXAMINATIONS.

FIRST EXAMINATION.

1. Physics.
2. Chemistry (Inorganic).
3. Biology.
4. Anatomy (Osteology).
5. An examination in Biology and Mammalian Anatomy will be conducted at the end of the Christmas term.

SECOND EXAMINATION.

1. Anatomy.
2. Physiology.
3. Embryology and Histology.
4. Materia Medica and Elementary Therapeutics.
5. Chemistry (Organic and Physiological).
6. Methods of Physical Examination.

THIRD EXAMINATION.

1. Medical and Clinical Medicine.
2. Surgery and Clinical Surgery.
3. Pathology.
4. Obstetrics.
5. Therapeutics.
6. Jurisprudence and Toxicology.
7. Topographical Anatomy.

The results of this examination will be considered in determining standing at the Fourth examination.

FOURTH EXAMINATION.

1. Medicine and Clinical Medicine.
2. Surgery and Clinical Surgery.
3. Pathology.
4. Obstetrics.
5. Ophthalmology, Otology, Rhinology and Laryngology.
6. Gynæcology.
7. Hygiene and Preventive Medicine.
8. Mental Diseases.
9. Pediatrics.

FIFTH EXAMINATION.

1. Medicine and Clinical Medicine.
2. Surgery and Clinical Surgery.
3. Pathology.
4. Gynæcology.

5. Obstetrics.
6. Ophthalmology, Otology, Laryngology and Rhinology.
7. Special Therapeutics.
8. Regional Anatomy.
9. Advanced Physiology.
10. Anæsthetics.
11. History of Medicine.
12. Life Assurance.

EXAMINATIONS FOR HONOURS.

Candidates taking seventy-five per cent. of the aggregate number of marks in the Pass and Honour Papers of the First or Second examination, or of one or more of the groups of subjects in the Final examination will be placed in the Honour list.

Additional papers on all Pass subjects of an examination may be set for the Honour candidates.

The subjects of the Final examination are grouped for Honours as follows:—

Group I. 1. Medicine and Clinical Medicine.
2. Pathology.
3. Therapeutics.

Group II. 1. Surgery and Clinical Surgery.
2. Pathology.
3. Topographical Anatomy.

Group III. 1. Obstetrics.
2. Gynæcology.
3. Pathology.

Group IV. 1. Medical Jurisprudence and Toxicology.
2. Hygiene.
3. Medical Psychology.

Only those candidates will receive their degree with Honours who have obtained Honours in the First, Second and Final examinations.

ADMISSION AD EUNDEM STATUM.

Undergraduates of other Universities applying for admission *ad eundem statum* must present certificates of having passed the examinations in the various subjects of this curriculum preliminary to the examination for which they desire to present themselves.

DEGREE OF M. D.

Bachelors of Medicine of at least one year's standing may obtain the degree of M.D. on the fulfilment of either of the following conditions:—

1. Having presented an approved thesis embodying the results of an original research conducted by the candidate in any department of medicine; or

2. Having passed the fifth examination.

ADMISSION AD EUNDEM GRADUM.

A graduate of any of the Universities in Great Britain or Ireland, if his degree be not an honorary one, may be admitted to the like degree in the University of Toronto. He must send in his certificate to the Registrar at least two weeks before the first meeting of the session of the Senate at which his application is to be brought forward.

MEDALS AND SCHOLARSHIPS.

Medals.

The Faculty offers a gold medal and three silver medals annually for competition among those students of the Medical Faculty who are Honour candidates for the degree of M.B., which will be awarded by the Senate on the recommendation of the examiners.

Undergraduate Scholarships.

The following scholarships are annually offered for competition amongst students who attend the Lectures of the University Medical Faculty:—

At First Examination .....one of $50
At First Examination .....one of $30
At Second Examination .....one of $50
At Second Examination .....one of $30

Every student taking a scholarship is required to sign a declaration that it is his intention to pursue his medical studies for two or three years, according to the year in which he has taken such scholarship, and to proceed to a degree in the University of Toronto, and that he is not an undergraduate or graduate in the Faculty of Medicine of any other University.

No scholarship will be awarded to any candidate who has not obtained honours in the examination for which it is conferred.

Each scholarship is tenable for one year only, but a scholar of one year is eligible for the scholarship of a succeeding year.

The scholarships or medals are not open to those who are at the same time undergraduates or graduates in Medicine of another University.

No undergraduate in the Honour course, who shall have degraded into a lower year, shall be permitted at any ensuing examination to compete for medals or scholarships, except by special permission of the Faculty, to be granted only in case of illness or for other grave reasons.

THE GEORGE BROWN MEMORIAL SCHOLARSHIP IN MEDICAL SCIENCE.

Dr. A. H. F. Barbour, of Edinburgh, having placed a sum of money at the disposal of the University of Toronto, for the purpose of founding a Scholarship in Medical Science in memory of the late Hon. George Brown, the following regulations have been adopted with regard thereto:

This scholarship shall be called the George Brown Memorial Scholarship in Medical Science and shall be awarded annually at the Convocation for conferring degrees in Medicine to the Bachelor of Medicine who shall have distinguished himself most during the Undergraduate course in the Honour course in Biological and Physical Science.

The award shall be made by a committee composed of the Professors in these subjects, who shall report as to the successful candidates, after having given due attention to the results of the annual examinations, and to the character of the work done by the candidates in the University laboratories.

The holder of the scholarship during the year of tenure is required to engage in original research in any one of the laboratories of the University, on some subject bearing on the advancement of medical science —the laboratory providing the material for the investigation.

The scholarship is to be paid in two portions, two-thirds at the time of award and one-third six months later, on the holder giving a satisfactory report (to whomsoever the University may appoint) of the work he has already done.

A report of the research, when completed, is to be given to the University.

The value of the scholarship consists in the proceeds of one thousand pounds sterling, invested at the rate of interest secured by the University for such benefactions.

The Reeve Scholarship.

The Reeve Post-graduate Scholarship, amounting to $250, which had been given for four years by the Dean of the Faculty, has, through the generosity of P. C. Larkin, Esq., been continued and will be awarded upon the following terms:—

The award shall be for one year, but in the event of the holder of the scholarship showing exceptional ability he may be re-appointed.

The holder of the scholarship shall devote his time to original research in the Department of Pathology or of Physiology. He will, however,

be expected to assist in the Laboratory, provided always that the amount of time required of him as such assistant demonstrator in the Laboratory shall not exceed four hours per week.

The award shall be made by a committee composed of the Professors of Physiology and Pathology and the Dean of the Faculty, who shall report as to the successful candidate after having given due attention to the results of the Annual Examinations and the character of the work done by him in the University Laboratories. The candidate selected shall be one who has during his undergraduate career given evidence of ability to pursue original research.

Applications for the scholarship must be sent to the Dean of the Faculty not later than the 15th of September, and the successful candidate shall begin work not later than the 1st of October, and shall devote at least eight months to the work.

The scholarship shall be paid in two instalments, half the amount on

Special attention of the Students is called to the fact that the Bursar's office hours are from 10 a.m. till 1 p.m. Fees will in no case be received on Saturday, and on other days the regulation respecting the hours specified will be strictly adhered to.

All fees are payable to the Bursar.

of the candidates for the medals.

FEES FOR INSTRUCTION.

Regular Students in Medicine.

Regular Students.

First, Second, Third, Fourth and Fifth Years—

Annual Fee, including tuition, library, laboratory supply, hospital and one annual examination:—

If paid in full on or before November 10th.....$150.00

By instalments:—

First instalment, if paid on or before November 10th..$75.00

Second instalment, if paid on or before February 10th..$80.00

The scholarships or medals are not open to those who are at the same time undergraduates or graduates in Medicine of another University.

No undergraduate in the Honour course, who shall have degraded into a lower year, shall be permitted at any ensuing examination to compete for medals or scholarships, except by special permission of the Faculty, to be granted only in case of illness or for other grave reasons.

THE GEORGE BROWN MEMORIAL SCHOLARSHIP IN MEDICAL SCIENCE.

Dr. A. H. F. Barbour, of Edinburgh, having placed a sum of money at the disposal of the University of Toronto, for the purpose of founding a Scholarship in Medical Science in memory of the late Hon. George Brown, the following regulations have been adopted with regard thereto:

This scholarship shall be called the George Brown Memorial Scholarship in Medical Science and shall be awarded annually at the Convoca-

A report of the research, when completed, is to be given to the University.

The value of the scholarship consists in the proceeds of one thousand pounds sterling, invested at the rate of interest secured by the University for such benefactions.

The Reeve Scholarship.

The Reeve Post-graduate Scholarship, amounting to $250, which had been given for four years by the Dean of the Faculty, has, through the generosity of P. C. Larkin, Esq., been continued and will be awarded upon the following terms:—

The award shall be for one year, but in the event of the holder of the scholarship showing exceptional ability he may be re-appointed.

The holder of the scholarship shall devote his time to original research in the Department of Pathology or of Physiology. He will, however,

be expected to assist in the Laboratory, provided always that the amount of time required of him as such assistant demonstrator in the Laboratory shall not exceed four hours per week.

The award shall be made by a committee composed of the Professors of Physiology and Pathology and the Dean of the Faculty, who shall report as to the successful candidate after having given due attention to the results of the Annual Examinations and the character of the work done by him in the University Laboratories. The candidate selected shall be one who has during his undergraduate career given evidence of ability to pursue original research.

Applications for the scholarship must be sent to the Dean of the Faculty not later than the 15th of September, and the successful candidate shall begin work not later than the 1st of October, and shall devote at least eight months to the work.

The scholarship shall be paid in two instalments, half the amount on the 15th of October, and the other half on the 15th of January, provided the scholar gives evidence of having satisfactorily carried on the work up to that date.

The Starr Medals.

The late Richard Noble Starr, M.D., devised certain property for the encouragement of post-graduate study in Anatomy, Physiology and Pathology, and in fulfilment of this object one gold and two silver medals, called the "Starr Medals," are awarded annually to three candidates for the degree of M.D., who have shown by the theses which they have presented for that degree, that they have successfully pursued such study in any one of these subjects. The theses for which these medals are given must attain a standard approved of by the Board of Examiners, and the relative value of the theses will determine the rank of the candidates for the medals.

FEES FOR INSTRUCTION.

Regular Students in Medicine.

Regular Students.

First, Second, Third, Fourth and Fifth Years—

Annual Fee, including tuition, library, laboratory supply, hospital and one annual examination:—

If paid in full on or before November 10th.....$150.00

By instalments:—

First instalment, if paid on or before November 10th..$75.00

Second instalment, if paid on or before February 10th..$80.00

Combined Course in Arts and Medicine.

Annual Fee, including college registration, library, laboratory supply, and one annual examination.

	Arts Fees.	Medical Fees.	Total.
First Year Arts	$58.00		$58.00
Second Year Arts	58.00		58.00
Third Year Arts and First Year Medicine	59.00	$85.00	144.00
Fourth Year Arts and Second Year Medicine	62.00	85.00	147.00

The fees for the Third, Fourth and Fifth Years in the Faculty of Medicine are as for regular students.

Payment of the Medical portion of the fees:—

If paid on or before November 10th $85.00

By instalments:—

First instalment, if paid on or before November 10th—$45.00

Second instalment, if paid on or before February 10th..$45.00

Repeating the year.

If paid in full on or before November 10th $50.00

The above fees are payable in advance. After November 10th a penalty of $1.00 per month will be imposed until the whole amount is paid. In the case of payment by instalments the same rule as to penalty will apply.

General Fees.

Matriculation, or registration of Matriculation	$ 5.00
Supplemental examinations	10.00
Admission ad eundem statum	10.00
Degree of M.B.	20.00
Degree of M.D.	20.00
Admission ad eundem gradum	20.00

In the case of candidates for the final examination, the fee for the degree must be paid to the Bursar not later than the 20th March.

CURRICULUM FOR THE DIPLOMA OF PUBLIC HEALTH.

1. The University shall offer a Diploma in Public Health (D.P.H.) on the conditions hereinafter detailed.

2. Candidates for the Diploma must be graduates in Medicine of this University, or of some other University recognized for this purpose by the Senate.

3. The curriculum leading to the Diploma shall extend over two Summer Sessions of three months each, and one Winter Session of six months.

4. The first Summer Session shall be devoted to Laboratory work in
   1. Sanitary Chemistry.
   2. Bacteriology.
   3. Parasitology.

5. The Winter Session shall be devoted to
   a. Advanced General Hygiene.
   b. Advanced General Pathology, including Theory of Immunity and Comparative Pathology.
   c. Elements of Geology, Meteorology and Climatology, in their relation to Public Health.
   d. Sanitary Engineering.
   e. Sanitary Legislation and Vital Statistics.
   f. Clinics on Contagious Diseases.
   g. History of Preventive Medicine and Epidemiology.

6. Candidates for the Degree of M.D. may substitute the foregoing Winter Course for such subjects or portion of subjects of the Fifth Year in Medicine as are not demanded by the College of Physicians and Surgeons of Ontario, at its final Examination.

7. The Second Summer Session shall be devoted to a course of Practical work in Public Health under the supervision of the Provincial Board of Health, including the methods of dealing with infectious diseases, inspection of schools and other public buildings, factories and dairies, inspection of water supplies and sewage disposal plants and other forms of municipal sanitation.

8. At the conclusion of the Winter Session an examination will be held on the subjects of the curriculum in Public Health specified in paragraphs 4 and 5, the passing of which shall be a necessary preliminary to entering upon the practical course indicated in paragraph 7.

9. Candidates who have passed the examination, and who present from the Provincial Board of Health a certificate of efficiency in the subjects specified in paragraph 7, will be granted the Diploma of Public Health.

10. The fees for the Course shall be $150, payable in two instalments of $75 each at the beginning of the first Summer Session and the Winter Session respectively. The fee for the Diploma shall be $20.

11. Up to and including 1907, graduates in Medicine who have acted as Medical Health Officers for a period of two years may present themselves for the examination referred to in paragraph 8 without preliminary attendance on the Courses of Instruction. For such candidates the fee for the Diploma shall be $100.

CURRICULUM IN DENTISTRY.

DEGREE OF DOCTOR OF DENTAL SURGERY.

Matriculation.

Candidates for the degree of Doctor of Dental Surgery must pass the Matriculation examination hereinafter mentioned, unless

1. They possess a degree in Arts (not being an Honorary Degree), from some recognized University; or

2. Having already matriculated in the Faculty of Arts in this or some other University in Canada; or

3. Are Matriculants in the College of Physicians and Surgeons of Ontario; or

4. Have passed the Form III. or Form IV. Departmental Non-professional examinations in which the Latin option has been taken, it being understood that the equivalent examinations under titles no longer in force will be accepted; or

5. Have passed an examination and received a certificate which is accepted by the General Medical Council of Great Britain for registration as a student of Medicine or Dentistry.

Candidates not possessing any of the above named qualifications, will be required to pass the examination prescribed for matriculants in the Faculty of Arts in this University, provided always that candidates registered as matriculants of the Royal College of Dental Surgeons of Ontario, shall be admitted matriculants in the Department of Dentistry.

Candidates of the degree must matriculate before writing on any of the subjects prescribed for the final examination.

Undergraduates.

Undergraduates (candidates for the degree), residents of the Province of Ontario, must have complied with all the requirements prescribed from time to time by the Board of Directors of the Royal College of Dental Surgeons of Ontario, for admission to examination for a certificate of license to practice Dentistry in Ontario.

Undergraduates (candidates for the degree), not resident in Ontario, must:

1. Have devoted at least three and one-half calendar years (not being engaged in any other business) to the study of Dentistry.

2. Must have attended at least four full courses of lectures, embracing all the subjects of the curriculum, of not less than seven months each, and including the daily clinic at a dental school recognized by this University; the last of which courses must be at the School of Dentistry of the Royal College of Dental Surgeons of Ontario.

3. Must have spent that portion of time, when not in attendance at lectures and clinics at the School of Dentistry, as students in the office of an approved dentist.

4. Persons holding the L.D.S. certificate, granted by one of the Medical authorities of Great Britain, and persons holding the B.D.S. degree of Melbourne University, Australia, will be admitted as undergraduates in the department of Dentistry, without further examination, and to the final examinations for the degree of D.D.S., on completing one full session at the School of Dentistry of the Royal College of Dental Surgeons of Ontario, and payment of the proper fees.

Examinations.

Candidates for the degree must pass two examinations, an intermediate and a final, an interval of not less than one year intervening between them. Until further provision be made, a certificate of having passed the intermediate examination of the Royal College of Dental Surgeons of Ontario will be accepted by this University.

Candidates for the final examination, which will be held at a time fixed by the Committee on Examinations, must present to the Registrar satisfactory certificates, covering all the requirements relating to undergraduates as given above, and of having passed the intermediate examination. The subjects for intermediate examinations shall be:—

(*a*) Comparative Dental Anatomy.
(*b*) General and Dental Histology.
(*c*) Bacteriology.
(*d*) Anatomy.
(*e*) Physiology.
(*f*) Chemistry.
(*g*) Dental Technic.
(*h*) Theory of Operative Dentistry.
(*i*) Theory of Prosthetic Dentistry.
(*k*) Dental Materia Medica.
(*a*) General Anatomy and special Anatomy of the Head and Neck.
(*b*) Physiology.
(*c*) Chemistry.
(*d*) Surgery and General Pathology.
(*e*) Medicine, Physical Diagnosis and Anesthetics.
(*f*) Theory and practice of Operative Dentistry. Dental Pathology.
(*g*) Theory and practice of Prosthetic Dentistry.
(*h*) Science and Practice of Dentistry.
(*i*) Orthodontia.
(*k*) Dental Materia Medica and Therapeutics.
(*l*) The Jurisprudence, Ethics and History of Dentistry.

Candidates shall be examined in practical work from time to time, during the session of the Royal College of Dental Surgeons, on completion of the required work in the Infirmary and Laboratories of the College.

Annual examinations in April, and supplemental examinations in September, will be conducted under the joint auspices of the University and the Royal College of Dental Surgeons of Ontario.

Regular students of the Royal College of Dental Surgeons of Ontario proceeding to the Degree of D.D.S. may take the final examination in any subject at the close of the session in which it is completed in the College.

Candidates will be credited at the Annual and Supplemental examinations for term work and term examinations conducted by the Professors in the several subjects, in the proportion of 30 to 70.

No candidate shall be considered as having passed on any paper unless he has obtained 50 per cent. of the marks allotted to the paper.

Equivalent Examinations.

Examinations in the Faculty of Arts in the Department of Natural Science, Division 1, are accepted in lieu of examinations for the degree of Doctor of Dental Surgery, as follows:—

(*a*) Physiology and Chemistry of the Second Year for the Physiology and Chemistry of the intermediate examination.

(*b*) Histology of the Fourth Year for the General Histology and Bacteriology of the intermediate examination.

(*c*) Chemistry of the Third Year and Physiology of the Fourth Year for Chemistry and Physiology of the final examination.

(*d*) On application to the Senate, similar credits may be given for similar examinations passed in the Faculty of Arts or the Faculty of Medicine of other universities.

Fees.

The fee for examination for matriculation, in whole or in part, or for registration of any certificate accepted in lieu of examination, shall be five dollars.

The fee for final examination shall be ten dollars, which shall be paid before writing on any subject of the final examination.

The fee for supplemental examination in one or more of the final subjects shall be ten dollars.

The fee for the degree of D.D.S. shall be fifteen dollars, which shall be paid before writing on the examination of the final year.

No fee shall be charged for transference from any Faculty of the University to the Department of Dentistry.

The fee for admission *ad eundem gradum* shall be twenty dollars.

Concurrent Course in Medicine and Dentistry.

Students who are matriculants in the Faculty of Medicine and in the Department of Dentistry, may take a concurrent course in Medicine and Dentistry which will extend over six years.

Students taking this course will pass the regular University examinations in the subjects of the Medical curriculum from year to year as they are completed in the Medical Faculty, and in the final Dental subjects of the curriculum in Dentistry, from year to year as they are completed in the Royal College of Dental Surgeons.

Students taking this concurrent course, who have fulfilled all the requirements for the degree of M.B., and who have successfully passed the examination in the Dental subjects of the curriculum in Dentistry, including Dental Materia Medica and Therapeutics, shall receive the degree of D.D.S.

FEES.

First and Second Years: $50 per annum for each of the four years of the course in Dentistry.

Third and Fourth Years: $100 per annum.

Candidates for degrees in the combined course are subject to the regulations respecting library, laboratory, examination and degree fees.
